Westgate II tower planned

Ground is expected to be broken next month for a 24-story tower to house 400 graduate students.

The tower will be the second building in a program to house more students on campus. Phillip A. Stroddar, Vice president, operations, of MIT said in making the announcement. It will be located at the extreme west end of the MIT campus near Memorial Drive and Audrey Street, just southwest of Westgate, a 16-story tower and four other buildings, completed seven years ago, where married students are housed.

The Westgate II tower will be divided into two-, three-, and four-student apartments, each one to include a living room, dining area, single study-bedroom, kitchen and bath. The apartments have been designed so that they can be converted in part or entirely into one-bedroom units suitable for occupancy by married students or young faculty, should future needs require, Stroddard said.

Community facilities, located on the first and twenty-fourth floors, will include laundry, mail and parcel rooms, service spaces, and a manager's office. The tower will have a structural steel core with exterior frame and window wall of precast concrete. The architects are Hugh Stubbins and Associates.
