MIT tenants fight eviction

By Bruce Schwartz

Tenants of a building near Memorial Hall and the MIT Museum have filed an eviction against the university because of their belief that MIT is failed to meet building code standards, with plans for renovation.

The residents of the building, known as the "house on Blanche Street," have been trying to negotiate with UMITA to avoid eviction since May 1970. The issue remains unresolved as of today.

The building houses 24 residents, including college students and staff members. The tenants have expressed concern about the safety and quality of the building's renovation work.

UMITA, on the other hand, has indicated that the building meets all relevant codes and standards.

Michael Hurley, a member of the UMITA administration, has stated that the renovation work is progressing as planned. He has also emphasized the importance of safety and quality in the renovation process.

Group to gather input

Concerning selection of new president

By Lee Giguere

UMITA's faculty advisory committee has requested input from all members of the university community on the selection of a new president.

The committee, which includes department chairs and faculty members, is seeking input on the qualities and characteristics that the new president should possess.

The committee's goal is to ensure that the selection process is transparent and inclusive, allowing all members of the community to have a voice in the decision-making process.

UMITA's administration has stated that it is committed to involving the community in the selection process and is open to feedback and suggestions from all members of the community.

CARS project is cut; UMTA refuses funds

By Jarvis Middleton

CARS, a project aimed at developing a dispatching system for fleets of vehicles, has been cut by MIT. UMTA has also refused to provide funding for the project.

CARS is a joint effort between MIT and the Urban System Laboratory (USL). The project, which was launched in 1971, aimed to develop a dispatching system for fleets of vehicles to improve transportation efficiency.

UMTA, however, has indicated that the project does not meet its funding criteria and has refused to provide support.

 faculty sets advisory panel

By Jarvis Middleton

UMITA's faculty advisory committee has been established to provide input on the selection of a new president.

The committee, which includes department chairs and faculty members, is seeking input on the qualities and characteristics that the new president should possess.

The committee's goal is to ensure that the selection process is transparent and inclusive, allowing all members of the community to have a voice in the decision-making process.

UMITA's administration has stated that it is committed to involving the community in the selection process and is open to feedback and suggestions from all members of the community.

The committee will meet in open session with students to gather input on the selection process. Students are encouraged to attend and provide their perspectives.

BUrley said that the student input would be considered in the selection process. He added that student input is crucial in ensuring that the selection process is inclusive and representative.

Hurry felt that student input would be handled by the student committee set up under CJC. Hurley said that the student committee would be independent of the faculty committee and would be responsible for gathering student input.

The faculty committee, on the other hand, would focus on the technical aspects of the selection process.

The faculty committee would consist of members from the faculty and administration. It would be responsible for providing input to the Corporation Committee.
