**GA stalls on SHL mixer**  
(Continued from page 11)  
the Executive Committee decided Wednesday to ask the Student Center Committee to make room on its schedule for a gay mixer. In this light, no action was taken on the original motion.

Individual members of the Executive Committee felt that the Dean's office is trying to stop the Student Homophile League from growing as a political organization, and that such a position is wrong.

The Dean's office has not come out with a statement on the issue since Dean Nyhart's statement against the mixer two weeks ago.

In other business, the GA voted to form committees, involving all the representatives, to investigate various areas in which the Assembly could expand its power. The committees should be formed by next meeting, and are due to draw final conclusions by the end of this term.

The Assembly also filled the vacancy in the Executive Committee caused by the resignation of Andy Gilcrest '71. Gregg Chisolm said that the Assembly's membership was taken on the original motion.

The General Assembly approved faculty plans making it harder to earn a double degree in five years. Both departments will have to agree on a student's program, a move designed to protect departments with light explicit degree requirements from having students "pick up" an extra degree in their department.
