The major differences between fiscal 1971 and fiscal 1972 would be the cost of oil, the major maintenance provision and $50,000 which was borrowed from the MIT advancement account. For the effective June 28, 1971: watchmen from $3.29 to $3.55 hourly, housemen from $3.05 to $3.29, maintenance men, $3.88 to $4.19.

Kenneth Browning would be moved from the Housing Office to that of Dean for Student Affairs, thus removing the present这就了 the may major maintenance system in Building E. And Browning had been a poor link at that, according to someone...

One former dormitory president could recall asking Browning repeatedly over a several month period (she had been used to an administrative staff of 100, this one obviously, starkly unavoidable:

increased rents, this one obviously, starkly unavoidable:

since that would result in charging students who live in

major maintenance is not done building by building,

account; the accounting of the charge per student for

the system draw as needed from the maintenance

clauses and set aside each year. The older buildings in

have been used with other dorms beginning several years

5% of the cost of construction; this amount to be

on- the theory that the buildings are in excellent

condition, and funds can be slowly stockpiled-for major

repairs, this obviously, starkly unavoidable:

that that rise in costs would be prohibitive. Instead,

Ashdown total 263,500

East Campus total 255,500

Campus 2. Paintoutside 10,000

Emergency lighting 9,000

Sprinkler systems 25,000

Wiring both parallels 100,000

Estimate of Needed Repairs, Consolidated Dormitory System

- the Housing Office does not expect the budgets of
different dormitories to balance nor is its accounting
by dormitory by dormitory. Not only would there be
the previously mentioned matter of charging residents
of a decrepit building more than those living in new ones.
