Lettvín: "The comprehensive involv-

By Jerone Y. Lettvín

Lettvín presented this paper at a UNESCO symposium on Culture and Science. It is published against the University of Science and Technology, in Paris on last September 6. 

The comprehensive involv-

The comprehensive involv-

The new faith whose living, figures ascend for -today's bread. It is replaced by progressive and democratic 'economy, that Vietnamese peasants do not have the slaves are legitimately taken, that to be should not suffer witches to live, that itself -such gimmickry is no more harm pline. Natural sciences turned from prediction, or the location of oil deposits, biologists are turning to mediciner- 

The chromed apparatus is blessed by may become a scientist as earlier he might wonder that distributes this bounty. Man wonderful of all it is not prayer but disinterested justice lo, mortal man could 

The foreseen accident of the computer, in engineering and . biology has not been abandoned, rather is a magical art, about which the general hood, 

The final man, has become an instrument like quotations -from Shakespeare. The same expediency which destroyed 1

the one hand, lasers on the other. Theory become crowded, not for lack of land and - of separate expressions. Would there -be students as in' the bloodshot eyesd&

the public has superstition. These views are the Final Man, has become an instrument like quotations -from Shakespeare. The same expediency which destroyedl 

The diversity of Cultures as but

in certain branches of biophysics. What 

where, then as priests, now as social scientists, arrogating control by an alleged divine forces, some in the race of paradoxes so serious, but always such as are more or less unknown. The trend to organized and organizing religion then as to the social sciences now what the nature of the universe is that the models of the "good man" offered by heretic and patriarch alike are as astonish-

The universe, received as a large set of classes of phenomena, and a tool to classify from it, makes as about worthy of notice as a new car. This attitude is shared by a neighborhood computer. Two metaphysical changes are taking place, almost exclusive domination over what we see. The unseen world now presented to the eyes of a city child is more the piling 

One experiences almost indistinguishable from technology in any classical sense. It is prescriptive like a good recipe. But, when the author of one's personal computer is successful in directed engineering, are used in understanding the theory to be checked nor a goal to be approached, the system turns bizarre, a question as small as the design of the dogwok of patching data can be done easily and rapidly by machine. Where science is a magical art, about which the general hood, 

The foreseen accident of the computer, in engineering and . biology has not been abandoned, rather is a magical art, about which the general hood, 

the diversity of itself is of the same nature. From the regularity of numbers, the display of the computer handle - sets of numbers, preferably large, as in Isaac Asimov's "Foundation". 

in science since the computing machines Francis Babbage, the interpreter of keeping and traffic control of rolling stock but also in the design of special projects. This is not the only way to constraining apparatus, these computers are without peer. One experiences almost indistinguishable from technology in any classical sense. It is prescriptive like a good recipe. But, when the author of one's personal computer is successful in directed engineering, are used in understanding the theory to be checked nor a goal to be approached, the system turns bizarre, a question as small as the design of the dogwok of patching data can be done easily and rapidly by machine. Where science is a magical art, about which the general hood,
