Tech boosters top Colby 2-1

By Nobie Minarcik

The Tech soccer team continued its winning ways last weekend with a 2-1 victory over Colby College. The boosters have won four out of their last five games and are now five and six on the season.

In other events, the fraternities were beaten by only one other team in a competitive meet. The Medallion eight was the mid-points of eight events. That crew was Dartmouth and composed of ex-gym school oarsmen. The MIT oarsmen were all novices. The graduate crew was clearly out of their class in the elite events, rowing against the US national championship eight.

Both the men’s and women’s varsity sailing teams scored victories this weekend. On Saturday the men won the MIT Open Regatta, and the women took first place in the Victorian Coffee Uni Trophy Regatta at Radcliffe. In other action, another varsity contingent placed fourth of nine teams in the Donogh Bowl at Holy Cross, and the freshmen took fourth in an invitational at Boston University.

In the MIT Open on Saturday, Alan Spence ’73, with Dean Ken Koo ’72 as crew, and Steve Cechichio ’74, sailing with Lane Thomas ’74, sailed out to the victory, as they both placed first in their respective divisions. With respective records (not necessarily in order of race) of 1-1-2-4-6 and 1-1-2-5-3, Alan and Steve easily outdistanced second place Main Maritimee. Pat Murray, the skipper, and Steve Cechichio, the coxswain, sailed on Lake Quinsigamond on Worcestership, a very light air condition. Frank Ballantine ’74, and John Lahey ’72 co-skipped Tech half, with Walter Frank and Randy Young, bothخالف, oared in Division ‘B’, taking low-point laurels. MIT finished fourth, as Coast Guard won the regatta. The results were: Coast Guard 19, Harvard 23, Boston University 18, MIT 22, WPI 41, Tufts 46, Brown 58, U. of Connecticut 64, and Holy Cross 65.

On Friday and Saturday, October 11 and 12, the Student Affairs Committee on Student Affairs sponsored and coordinated the development of the athletic program. The committee, consisting of members, discussed intersports programs accepted by the Student Council and the President’s Office. The student’s right to participate in intersports programs was also discussed, and significance placed on the institutional programs.

The morning session began with a welcome by President Joseph Wiesner, and Dean of Institute Relations, Bensen, followed by three talks by Daniel Nyhart, Dean for Student Affairs, outlined the educational and motivational results of intersports programs. Richard Smith, Director of Athletics, then spoke on the organization, goals, scope, and problems of the athletic program, covering topics including the physical, social, and psychological benefits of sports, and the student’s right to participate in intersports programs.

The MIT Planning Office. Simha Abin, a representative of the MIT Planning Office, presented the findings of the survey of athletic programs, and the need for future projects into short, medium, and long range plans. The survey, conducted under the direction of the Student Affairs Committee, was designed to provide information on the educational benefits of intersports programs.

The afternoon session was devoted to the development of satellite facilities for short, medium, and long range plans. The session was conducted under the direction of the Student Affairs Committee, was designed to provide information on the educational benefits of intersports programs.
