Wrestlers crush RPI with easy 52-0 score

By Mike Charette

The indoor track team lost to Tufts but pulverized Williams 63-5-319, in a triangular meet held at Rockwell Cage on Saturday. The thimalcals, whose score is now 4-2, made some remarkable displays of Tufts' strong middle and long distance running attack, which forbadates the fascination competition at the New England indoor championship.

Brian Moore '73 displayed his usual vigor in winning both the 35-3 weight throw and the shot put with heaves of 56'2" and 49'5Y4", freshman Gary Hill and Alex Tkachykov '73 took second and third respectively in the shot. Dave Wilson '73, who has been perfecting his style, and hence sacrificing some height on a short-term basis, propelled himself to an elevation of 13'6" in the pole vault, with Ned Rich '72 taking fourth.

In the long jump, Scott Peck '73 tied the second place points by taking second and third places. Later in the day, Bob Tronnier '73 leaped 60' in the high jump for third place, with Peck and Lau jumping 5'10" to tie for fourth.

An exciting race was seen in the one mile, as Tufts' dynamic runners duo of Dan Myosinhan and Hamilton Amer, and Bob Myres '72 finished within six-tenths of a second of each other.

The two mile was also close, with Amer finally pulling away from Craig Lewis '72 in the last lap to win in 9:40.8. Meanwhile, Don Wesson '74, foreground, and Al Lau '72 came off the hurdles in Saturday's tri-meet with Tufts and Williams.

Chip Kinball '72 took second place in the 1000 yd. run, and Bill Lennihan '73 took third in the 600 yd. run in a fine time of 1:17.0, with Tom Hansen '74 acquiring fourth place.

New England's top high hurdles competitor and Don Slavin of Tufts battled fiercely in the 65-yd. high, but Slavin's fast start provided a winning margin of one foot over Tronnier in a time of 5.8. In the 50-yd dash none other than freshman Gary "B.B." Wilkes took a fourth place.

Both the one and two-mile relays were tight races, with the one-mile team of Wilkes, George Chena '74, Dick Hester '75, and Lee Banker defeated by six-tenths by Tufts. In the two-mile relay, the team of Myers, Jim Gorman, Hansen and Kingball defeated Tufts by 1.4 seconds. At the last handoff, both Dan Myosinhan and Chip Kinball were neck and neck, but Kinball produced an excellent 61 second quarter to pull away from his opponent.

The team faces Bowdoin next Saturday afternoon at the Rockwell Cage.

RESULTS

35 lb weight: 1) Moore (MIT), 56'2"; 2) Davis (T), 47'6Y4"; 3) Smith (W), 25'5".

Long jump: 1) Gorham (T), 22'7 Y4"; 2) Peck (MIT), 21'8 Y4"; 3) Lau (MIT), 21'5 Y4"; 4) Mertz (W), 21'2 Y4".

Shot put: 1) Moore (MIT), 49'5Y4"; 2) Wilkes (MIT), 48'8"; 3) Tschyrykov (MIT), 40'4 Y4"; 4) Smith (W), 33'2 Y4".

High jump: 1) Mertz (W), 6'2 Y4"; 2) Gorham (T), 6'0 Y4"; 3) Tonnier (MIT), 6'0 Y4"; 4) Peck, Lau (MIT), 5'10 Y4".

Pole vault 1) Wilson (MIT), 13'6 Y4"; 2) Brown (T), 13'0 Y4"; 3) Harrison (T), 12'5 Y4"; 4) Rich (MIT), 12'0 Y4".

50 yard: 1) Elliott (W), 5.6; 2) Gotha (T), 5.6; 3) Tronnier (MIT), 5.6; 4) Debose (T).

100 yard: 1) Mabee (T), 11.5; 2) Davis (T), 11.6; 3) Leimkuller (MIT), 11.7; 4) Hills (W), 11.8 Y4".

200 yard: 1) Tufts (T), 23.1; 2) Tufts (T), 23.2; 3) Tufts (T), 23.4; 4) Tufts (T).

400 yard: 1) Tufts (T), 48.1; 2) Tufts (T), 48.1; 3) Williams (W), 48.2; 4) Tufts (T).

One mile: 1) Myosinhan (T), 4:23.5; 2) Amer (T), 4:24.0; 3) Myers (W), 4:24.1; 4) Conolly (T), 4:34.7.

Two mile: 1) Amer (T), 9:40.8; 2) Lewis (MIT), 9:46.2; 3) Farrell (W), 9:53.8; 4) Kaufmann (MIT), 10:15.9.

One mile relay: 1) Tufts (Debose, Davis, Palmer, Mabee), 3:40.7; 2) MIT, 3:41.3; 3) Williams, 3:46.2.

Two mile relay: 1) MIT (Myers, Gorman, Hansen, Kingball), 6:27.4; 2) Tufts, 6:28.8; 3) Williams, 6:39.7.

This business of survival

Under the incentives of national survival, the aerospace industry, utilizing advanced technologies, has developed into a permanent, flexible and highly diversified industry. The need, in the future, to apply the aerospace systems approach to pollution control, mineral exploration, environmental planning, agriculture, forest management, desalting of seawater, modern transportation, air transport and control has greatly added to this diversification. Since the aerospace industry is not directly geared to the consumer, its benefits are social ... national survival on one hand ... a better life on the other.

Positioned in the forefront of this remarkable industry and led by the ideas-emanating from its own advanced planning, scientific disciplines and industrial skills, Grumman pushes the aerospace art forward in deep submersibles versus, hydrofoil seacraft, advanced aircraft including business jets. The successful astronaut landings on the lunar surface with the Grumman-built LM (Lunar Module) is an illustration of the company's capability.

It's only natural in a company with a broad spectrum of scientific endeavors that professional and management responsibilities would proceed apace. Engineering and Business Administration majors will like the challenge. Problem solving is the way of life in Engineering, Research and various business-oriented areas.

Can you provide cogent solutions?

Grumman is situated in Long Island, 30 miles from N.Y.C. The white sand beaches of the Atlantic are 15 minutes away ... the famed sailing reaches of the Great South Bay, an eleven-mile drive ... five beautiful public golf courses right in Bethpage-5 minutes from Grumman.

Grumman representatives will be on campus.
