By Debra Deuts.

What do square dancing, the flow of sludge mold, young professional lute players, and a display of an Apollo space capsule have in common? They will all be found at MIT's next Open House, to be held on April 12, from noon to 5 p.m. Run by the Open House committees, which are chaired by Yale Zuzman '74, the event, which will be open to the general public, has had its trials and tribulations. A letter-designated to inform department heads of Open House's existence, and of the need for each department to coordinate its exhibits was bot-tled up for a while on the desk of the Institute's administration. Once it got out, however, Open House went into high gear, with members of the exhibits sub-committee spending many hours on phones in an effort to get co-ordinators and exhibitors. It needed help on all levels to provide help for information booths, refreshment stands, and to act as tour guides. The entire Institute will be used and people are liable to be confused by the labyrinth of corridors.

Suggestions for exhibits should be directed to appropriate departments, since plans are not yet final. There is also a great manpower shortage. People are needed on all levels to provide help for information booths, refreshment stands, and to act as tour guides. The entire Institute will be used and people are liable to be confused by the labyrinth of corridors.

The Open House committee has received several thousand postcards from MIT Publications in order to let the members of the community know what's going on. People are being asked to help distribute them around Boston and Cambridge. Letters will be sent out to parents and the newly-admitted class of '76 in order to give them a chance to find out what MIT is all about before they make their college decision.

Some of the exhibits planned are tours of the Green Building (Course XII), a ship model in building 48 (Ocean Engineering) and Tech Model Railroad Club's railroad. The Green Building's tours will be in three categories: Earthquakes, Planetary Science, and Oceanography. These will feature a visit to a mass spectrometer age determinations, and the chance to see satellites in action.

People interested in helping Open House in any capacity should call the Open House office at x1435, x1440, or x1437 or the APO office at x3788 or x3856.

NOTES

* There will be an important meeting of the Interdisciplinary Conference on Tuesday, April 4 at 8 p.m. at Kappa Sigma, 53 Bay State Road. Topics will include: Electrons of no constraint, further clarification of the Great MIT Extension Phone Mystery, Faculty Affiliation discussions and Reactions to the Budget of MSE.

* The Compton Lecture Series Committee will present Dr. Jerome Bruner, professor of psychology at Harvard, in a series of two lectures on "The Nature and Uses of Imagination" on Tuesday and Friday, April 4 and 7, at 8 p.m. in Kneale Auditorium. The Thursday lecture is entitled "The Private Evolution of Education." and on Friday Dr. Bruner will talk on "Models, Tutors, and Human Pedagogy." Five tickets will be distributed to people with MIT ID's on Wednesday morning in the Building 10 lobby. The doors will be open to the general public at 7:30 each evening.

* The MIT Chinese Students Club is sponsoring China Week at MIT, April 4-8. There will be a free film festival in Rooms 407, Student Center, from 7:30-11:oo p.m. on April 4-6.

* Dr. Eugene Hoen, Chairman of the Committee on the Americas at the Albany Medical College of Union University will speak on Thursday, April 6, at 5 p.m. in a panel discussion on "The Future of the Americas." The panel will include Dr. Hoen and three representatives of universities in the Americas.

* MIT Dance Workshop - come to a meeting with Anita Balkin or dance in the"Jive and Mire" from 7:30-11:00 p.m. in the McDonald West Playhouse. Refreshments. All are welcome.

* Lawrence L. Weed, M.D., Department of Medicine, University of Vermont, will discuss "Teaching a Cure of Doubt (Why Teaching a Cure of Knowledge Is Wrong)") at an EEC Colloquium in the Bush Room on Friday, April 14 at noon.

* Hey Fresh! You've been living on this campus for two years. It's time to learn how to take care of your health. There will be a panel discussion at 7:00 p.m. in a seminar lecture room preceding the meeting. Thursday, April 7 at 7:30 p.m. in the McCormick West Playhouse. Refreshments. All are welcome.

* Anyone interested in refereeing intramural soccer this spring should attend the referees' clinic Wednesday, April 5 at 7 p.m in room W33-137.

* The Engineering Projects Laboratory will present a survey of research programs in the MIT Department in the Vannevar Bush Room at the Tech Model Railroad Club in the Boston Building at 4:30 p.m. The program will include presentation of various demonstrations and laboratory demonstrations concerning urban traffic, high speed vehicles, and the co-ordination of technical research and education in the political environment. Students, faculty, staff, and visitors from outside MIT are cordially invited to attend.

* Students interested in planning a junior jersey or a senior thesis abroad program should contact Dean Hazen in the Foreign Study Office, Room 10-303, x3243, as soon as possible. Deadlines are coming up for the 1972-73 junior year abroad programs, so come on over.

**CHINA WEEK**

APRIL 3-8

* Slides in Building 3
* Gift shop in lobby of Building 10
* Parties
* Gifts
* Tickets for the China Nite Variety Show
* Free Film Festival
* Slides and movies depicting aspects of Chinese life
* Shown in Rm. 407, Student Center, 7:30-11PM, April 4

* Party
* 8-12PM, Friday, April 7, in Roberts
* Admission - $2.00 in advance
* $2.50 at door

**CONCLUDING WITH**

* China Nite Variety Show
* Featuring a free performance of Peking Opera

* In addition, choral and instrumental acts
* 8PM, Auditorium Saturday, April 8

* Reverse tickets: $2.35, Sold in Building 10 and at the door. Reservations may also be made on x4720.

Why doesn't General Electric talk about thermal pollution when they talk about nuclear power plants?

General Electric has been talking nuclear power plants ever since we pioneered them in the fifties. And we think they can help solve America's energy problems in the 70's and 80's. But we're also aware that nuclear power has problems of its own.

Electrical engineers talk about the nuclear power environment. Actually, we felt one of the greatest advantages of nuclear power was environmental. Unlike fossil-fueled power plants, there is no smoke to pollute the air. But like fossil-fueled plants, there is warmed water released to surrounding waterways.

Cooling it.

We recognize thermal pollution as a serious problem. And GE and America's utilities are working on thermal problems at nuclear sites on a plant-by-plant basis.

Many people don't realize, for example, that utilities are required by federal law to design and build cooling systems to solve the cooling problem at most sites. There is no smoke to pollute the air. But, in addition, utilities are required by federal law to design and build cooling systems to solve the cooling problem at most sites. But, in addition, utilities are required by federal law to design and build cooling systems to solve the cooling problem at most sites.

If you run into a problem, how do you fix it? Well, we've been running this ad since 1970. It's one ad of a series on the problems of man and his environment. And the answer is, we're running this ad.
