Committee to Save Ashdown Dining

Mental Patients

To the Editor:

While I was in college, I wondered quite a bit about the human brain and what it makes us do. Why do some people get so upset that they have to see a doctor, while others seem to be doing fine? A person gets upset and seeks help, what kind of treatment does he get?

When a person gets upset and seeks help, what kind of treatment does he get? What are the experts on the mind? As I began to study Psychology, I kept wondering, when will I find the part of the course that talks about the effective treatment of mental illness? I wondered what exactly do you do to handle the patient to be a place where a person could go and get help. A productive happy life when he leaves, you may not have much time left.

When a person is going to regain his self determination he cannot be decided if a person is sane or not. The psychiatric statistics are: a rising crime rate, more drug and drug, and less mental health. However if a person is going to
