Student injured in 48 ft. fall

By Paul Schindler

Dean Walter Waszynski of Burton House fell four floors, from his room to the ground, last Tuesday morning at about 5:45 a.m., and survived.

...he heard the ground, he went through a window drain, a closed window, and a screen outside the window. In addition, windows in Burton are three feet above the floor. Waszynski said that he was sleeping when he went out the window which, he said, he must have done in his somnambulous state. The bed in his room was directly next to the window.

At 5 pm Tuesday, Waszynski was contacted by phone at Mt. Auburn Hospital. He told The Tech that his injuries were apparently ameliorated by the fact that he fell on soft dirt; and the fact that his body was in a relaxed, sleep-like state. "I guess I was lucky."

TCA reads ready evaluation

(Continued from page 2)

I leverage, it is useful to some students, in that if they must choose between two courses it can help them determine which one best suits their needs. Unfortunately, professors rarely pay much attention to this particular feedback from their former students.

According to project chairman Paez, "Professors just look at the comments and say 'Oh, is that what they think of me?'" At the comments and say 'Oh, is that what they think of me?'

Auburn Hospital. He told the Tech that his injuries were apparently ameliorated by the fact that he fell on soft dirt; and the fact that his body was in a relaxed, sleep-like state. "I guess I was lucky."

The TCA reads ready evaluation is a course evaluation guide to be used in hiring and firing of professors or teaching assistants. According to Paez, "Professors just look at the comments and say 'Oh, is that what they think of me?'"

Unfortunately, the present course evaluation guide comes out registration day. By then, it is too late to be useful to many. At present, because of lack of help, this is the earliest it can be released. Publishing it earlier can only be accomplished by people working on it over Christmas vacation and summer."

The Committee on Educational Policy has admonished the Guide's staff against using Institute facilities. The CEP takes this stand because they feel that the Guide is useful only to students because of its form. Re-thinking of the process will also include changing the form.

According to Robert Sacks, "MIT is primarily a research, not a teaching institution. It has just gotten around to setting up the education division. It is now beginning to 'get things together' with respect to education. Before, faculty members were judged on their research ability, not teaching ability. Professors considered excellent teachers by their students have been fired."

TERADYNE MAKES SENSE

if you're an ELECTRICAL ENGINEER who

--- loves engineering for its own sake; it is a natural born tinkerer, just as comfortable with a soldering iron as with a slide rule.
--- wants the freedom to follow your interests as they develop—whether it be circuit design, test engineering, field engineering, applications engineering or software development that interests you. You don't have to choose your life's work the day you arrive.
--- believes in a company which does well-known things well, especially when the company has a line of automatic component test equipment that leads its worldwide industry. (No one else in our tax bracket can ever guarantee!)
--- likes the idea of joining an electronics firm that has been different and stay-right for a downtown Boston, close to outstanding schools, good theater, great restaurants—the action.
--- appreciates a fast-growing company that depends on capable people to keep it growing.

If this MAKES SENSE to you, see our representative on campus on Tuesday, February 6.
