Join a group of MIT grads

TTL Engineers
Programmers

We achieved a breakthrough in computer graphics and have granted patents on a new technology. We recently joined Hughes Aircraft Company as an autonomous Product Line within the Industrial Products Division. To properly exploit these advantages, we need a select number of really creative people and can offer them an exciting and challenging career.

You will be joining a team of 16 professionals which includes seven MIT grads in key positions. As a relatively small autonomous group we can offer ideal working conditions:

--- An atmosphere conducive to creativity and growth.

--- A flexible and open-minded approach to work.

--- The benefits of working for a company with a worldwide reputation for professional excellence.

--- A smog-free environment in North San Diego County, within a mile of the ocean and with endless beautiful beaches.

Our Division also makes other high-technology equipment for commercial applications, such as an apparel laser cutter and video storage memories, and undertakes R&D in emerging areas, such as charge-coupled devices and liquid crystal panels.

Please send us your resume, or write us, or call us collect: Mr. Luis Villalobos (MIT '81), Product Line Manager, (714) 757-1200, Ext. 324, Hughes Aircraft Company, 2020 Oceanside Boulevard, Oceanside, CA 92054.
