Buy the BSR 710 or 110.

Either way, you'll get the shaft.

The BSR 710 and 719 have their brains in the shaft. A carefully matched metal rod holds eight precision-molded metal balls. When the cam shaft turns, the balls make things happen. A look is released, an arm raises and swings. A record drops, a platter starts spinning, the arm is raised, the arm stops, the arm raises again, it swings back, another record is dropped onto the platter, the arm is lowered again, and so on, for as many hours as you like.
