Sailors keep Schell Trophy

After a slow start the MIT sailing team has improved every week, this season culminating in last weekend's victory in the New England Team Racing Championships (Fowle Trophy) and this past week's successful defense of the Schell Trophy.

The Schell, which was hosted by MIT, is New England's unofficial fall dinghy championship (two boats per school) and includes the top nine teams from the New England Intercollegiate Sailing Association (NEISA). NEISA encompasses all thirty-two colleges in New England which are involved in intercollegiate sailing.

Each invited NEISA team had won at least one major trophy that season. The exception was Yale, which was invited to complete the field (two boats per school) and included the Fowle Trophy and the Schell Trophy. The windiest weekend of the season culminating in skipper Steve Cucchiaro '74 was chant Marine Academy 161, and MIT's captian and A-Division Franklin Pierce 182, US Merchant Marine Academy 161, and Royal Military College (Canada) 163.

As MIT "B" team was also victorious in a field of seven in a dinghy meet held at the Coast Guard Academy on Saturday. Skippers were Bob Parker 73 and Walter Frank 74, The Froth Champs were the only school being run at Tufts this past week has been held over until this weekend because of high winds, and the women's team's event at Stonehill College was canceled because of the same conditions.

The men's varsity has a dinghy meet at Harvard tomorrow and will end its fall season next weekend at the Coast Guard Academy in the Atlantic Coast Championships (Fowle-Harriman-Sligh Trophy). The women's squad will complete its schedule tomorrow with the first running of the Wire Trophy, which was donated by friends of Prof. Emily L. Wick, who left MIT in June after many years of deep commitment to total involvement for women at the Institute.
