Pantaloons & tunics, Courtesans & eunuchs

The MIT Musical Theatre Guild brings a veritable Roman Circus to life in its production of A Funny Thing Happened on the Way to the Forum. Through a story line abounding with mistaken identities, impossible coincidences, and near-tragic confrontations, the show (supported by Stephen Sondheim's fabulous score) grows from comic situations and stock comic characters into a fast-paced extravaganza of ancient fun in a modern style.

Shown in rehearsal are: (left) Bob Greer as Erronius and Scott Roby as Hysterium; (center) Sandy Sandbetts and Patti Prescott as the Geminae, with Jesse Abraham as a eunuch, Tom Gilligan as Marcus Lycus, Mitchell Rothstein as Pseudolus, and Bill Higge as Hero; (right) Thalia McMillon as Philia.

The production opens this evening In Kresge Auditorium. For further information, see ad on page 2.

You're serious about photography. So is the Canon F-1.

To you, photography is more than a hobby. You may never want to become a professional. Yet, your photography is as important a means of self-expression to you as your speech. You demand the same excellence in your photographic equipment as you do of your photographic skills.

The Canon F-1 is the camera that can fulfill any photographic task to which you put it. It can stand up to your ability in any situation.

Naturally, a great camera like the F-1 won't ensure great results. That's up to you. Yet— it's nice to know that your camera can grow with you as a photographer.

Part of the reason for this is the F-1 system. Since it was designed in totality, it offers total performance. There is nothing "added on" in the F-1 system. Everything works as it was designed to, and integrates superbly with everything else. You'll spend less time worrying about operating the camera than in shooting. And that's what creative photography is all about.

Sharing these lenses and many of these accessories are the new Electronic Canon EF, with fully automatic exposure control, the F70, now improved with all exposure information visible in the finder; and the TLb, great for a second camera body or for getting started in Canon photography. Canon. For serious applications. For serious photographers. Isn't it time you got serious?
