UA election process needs help

(Continued from page 1) The decision will undoubtedly be a tough one on the candidates, Michel and Wallman had been operating for a while under the false rumor that Michel had won, and the announcement of the re-vote came as a shock to both of them. All candidates may suffer from the suspicion of having been the slate for which the ballots were stuffed, but the committee has carefully withheld this information so that the new election will not be prejudiced.

Due to numerous requests

Tech Engineering News
MIT's undergraduate professional journal will have office hours at the following times:

- **Wednesday April 17**
  - 3-5 pm
  - W20-453
- **Thursday April 18**
  - 3-4 pm
  - x3-2989
- **Friday April 19**
  - 2-4 pm

Inquiries concerning subscriptions or guidelines for contributors are welcomed at this time.

Future hours will be announced.

You're serious about photography. So is the Canon F-1.

To you, photography is more than a hobby. You may never want to become a professional. Yet, your photography is an important means of self-expression to you as your speech. You demand the same excellence in your photographic equipment as you do of your photographic skills.

The F-1 is the camera that can fulfill any photographic task to which you put it. It can stand up to your ability in any situation.

Naturally, a great camera like the F-1 won't ensure great results. That's up to you. Yet—it's nice to know that your camera can grow with you as a photographer.

Part of the reason for this is the F-1 system. Everything works as it was designed to, and integrates superbly with everything else. You'll spend less time worrying about operating the camera than in shooting. And that's what creative photography is really all about.

Sharing these lenses and many of these accessories are the new Electronic Canon EF, with fully automatic exposure control, the FTH, now improved with all exposure information visible in the finder, and the TLb, great for a second camera body or for getting started in Canon photography.

For serious applications. For serious photographers. Isn't it time you got serious?
