Police Blotters is a compilation of information prepared by Campus Patrol to report crimes occurring in the MIT community.

4/13/74
Report was received by the Campus Patrol of the removal of the State Flag of Massachusetts from the flagpole at the Great Court.

4/11/74
An occupant of Building 206 reported the theft of a black six-button phone with intercom system missing from his desk.

4/12/74
An attempted larceny of a motor vehicle was reported this date. The vehicle was parked on Memorial Drive. The owner further reported that a "Krook" lock protected the larceny of the vehicle.

4/12/74
At 1:30am two members had their nocturnal swim disrupted at the Alumni Swimming Pool and were requested to confine their athletic abilities to a more suitable time period.

You're serious about photography.
So is the Canon F-1.

To you, photography is more than a hobby. You may never want to become a professional. Yet, your photography is as important a means of self-expression as you use it. You demand the same excellence in your photographic equipment as you do of your photographic skills.

The Canon F-1 is the camera that can fulfill any photographic task to which you put it. It can stand up to your ability in any situation.

Naturally, a great camera like the F-1 won't ensure great results. That's up to you. Yet — it's nice to know that your camera can grow with you as a photographer.

Part of the reason for this is the F-1 system. Since it was designed with functionality in mind, it offers total performance. There is nothing "added on" in the F-1 system. Everything works as it was designed to, and integrates superbly with everything else. You spend less time worrying about operating the camera than in shooting. And that's what creative photography is really all about.

Controlling the camera to take pictures of people is no accident. Professionals who depend on a camera for their livelihood have a deep regard for the F-1's handling. It's amazing how much a comfortable camera can improve your work.

Sharing these lenses and many of these accessories are the new Electronic Canon EF, with fully automatic exposure control. The F-1, now improved with all exposure information visible in the finder, and this L. B. great for a second camera body or for getting started in Canon photography. Canon. For serious applications. For serious photographers.

Is it time you got serious?
