Admissions expects 1030 frosh

(Continued from page 1)

As the first of these housing decisions were made, it appeared that about 40 freshmen would still be living in the dormitories or fraternities. About 400 freshmen join fraternities. The remainder are assigned places in the dormitories. However, assignments being determined by a lottery. A larger class or smaller class means that more students are assigned to dormitories. As upperclassmen usually have the single rooms, overcrowding usually means that rooms are tripled in doubles or quadrupled in triples for at least their first term.

With a projected class of about 30 more students, the degree of overcrowding increases. Assistant Dean for Student Affairs Ken Browning has based his estimates on the housing situation on a Registration Day class size of 1035. He expects that there will be about 375 freshmen (plus a few upperclassmen) but hopes that the number will be higher as every student who joins a fraternity will ease the overcrowding by that much.

About ten students are expected to join Student House about 20 are expected to commute. Therefore, Browning will have to find 630 beds for freshmen plus a few upperclassmen to the system (usually 40 but more likely limited to 20 this year due to the lack of space). The problem is that right now there are only 450 spaces available.

The situation is not as firm as it was in the past. Every year, particularly in late August, a number of upperclassmen cancel their assignments as they find apartments of their own. Like the frosh, cancellation so far this year have been slow -- only 10 compared to about 25 this time last year. Browning hopes that the return to the usual 30 freshmen, as well as for missile duty volunteers and advanced math students. These cover full tuition, reimbursement for textbooks, as well as lab and incidental fees. Not only that, but you can receive college scholarships available to flying qualified minority students. Fortunately the Air Force has done something to catch up with it. It has increased the number of slots set aside for minority students, as well as for minority duty volunteers and advanced math students. These cover full tuition, reimbursement for textbooks, as well as lab and incidental fees. Not only that, but you can receive college scholarships available to flying qualified minority students.

The other source of the problem is that class size has usually been slightly greater than available housing space, the worst cases being this year and the class of 1976 (1050 students, 50 more than expected).

The Class of 1978

The Class of 1978 will set the record for the highest proportion of women, about 20%. This is a continuation of the trend towards increasing female enrollment, as accomplishment which is mostly the result of an active campaign to recruit more women applicants. The campaign was intended to make the possibilities available at MIT known to qualified women and members of other minorities.

Of the 1053 still intending to attend, Cohen reports that 47 are black, six are of Puerto Rican heritage, nine are Mexican Americans, and one is an American Indian. All numbers show slight increase, and Richardson still expresses his disappointment at the failure to attract larger numbers of qualified minority applicants.

Don't let the price of a college education shake up your world.

The price of a college education is skyrocketing. Fortunately the Air Force has done something to catch up with it. It has increased the number of slots set aside for minority students, as well as for minority duty volunteers and advanced math students. These cover full tuition, reimbursement for textbooks, as well as lab and incidental fees. Not only that, but you can receive college scholarships available to flying qualified minority students. Fortunately the Air Force has done something to catch up with it. It has increased the number of slots set aside for minority students, as well as for minority duty volunteers and advanced math students. These cover full tuition, reimbursement for textbooks, as well as lab and incidental fees. Not only that, but you can receive college scholarships available to flying qualified minority students.

PUT IT ALL TOGETHER IN AIR FORCE ROTC
