Leonard Bernstein is organizing the seminar on music, linguistics and aesthetics. Bernstein is taking part in the seminar, which meets at least once a week. The seminar represents a national trend in higher education to bring together the different perspectives of linguists, philosophers, and scientists. It is being teacher directed, as is most computer-assisted vehicle or plotter controlled classroom teaching, but it is designed to get away from the concept of the child being teacher directed. Turtle Geometry is designed to help children describe paths and shapes and to do so in an environment similar to that in which they can see their results immediately. The Division currently has a faculty in the planning stage that will provide educational innovators with the forms of technology necessary to produce new and improved learning environments. Other limited facilities that are currently underway, according to Assistant Director Paul E. Brown, include: 2.5 pints, while Baker House, as usual, led the dorms with 99 pints. MIT would like to "help the Iranians through the master's level in nuclear engineering, according to Bruce. "The Iranians have bought five nuclear reactors and are prepared to accept and help Iranian students who are being trained for faculty positions at the new university will also be sent to MIT, Brown added. These students would be admitted on the same basis as any other foreign students, he said. Another program involves a group of private citizens in Iran who would like to build a Russian science university patterned after MIT. MIT's contribu- tions to their effort, Brown said would "help in developing goals and objectives." Professor of Nuclear Science Burton 3, which delivered 27 pints from 49 residents, and Dexter 6 (31 pints) were the dormitory winners and will also receive a key of beer. "The drive went really well," said Goodman, "It was very smooth, with no big crowds except Friday afternoons."

The fall 1974 Blood Drive netted 1473 pints of blood, exceeding last year's total by almost 50, according to Wendy Goodman '76, TCA blood drive chairman. Two fraternity houses, Pi Kappa Sigma and Beta Theta Pi, each won a slab of beef for giving the largest percentages of donors from among the fraternity houses. The 26 pints of blood while 19 pints were given by the 27 HIP fraternity brothers.
