**New giggling cops The Tech board**

**Special to The Tech**

A gaggle of orphans and managers will take over operation of The Tech in February, following elections that will be held on the day morning in the newspaper's Student Center offices.

The new 20-person board, elected in a three-hour-long meeting in a small-dining room, will be responsible for the 95th annual volume of the student newspaper. That volume will begin in February, 1975, and last for one year.

John H. M. Hanzel '76, currently Managing Editor of the paper, will head the new board. Chicagoan Hanzel, a management major who was appointed for the position of Chairperson, was not elected until the 12th ballot, when he assured Board members he could still sign his name. The final vote was made by acclamation.

News Editor Mike McNamara '76, political editor of the new board in what promised to be the closest race of the day, although as many as six opponents had faced him for the honor of the chief editorial spot, all had dropped out of the race minutes before the vote, leaving the tail Hoover holding the bag.

The board then voted to leave the position of Executive Editor, created at the election meeting one year ago, on the Board, but to leave the post vacant for Volodkoff '75. Incumbent Norman D. Sandrie '75 was elected Com-

since the 1940s. "We can only seek to remain here until the Paris agreement is fully imple- 
mented," he said. "Then the Vietnamese people will be able to choose their own government, and it will be safe for us to return."

As explained that he came to the US in 1968 to study elec- 
tronics at the Northrop Institute of Technology in Los Angeles, Cal., with help from an AID scholarship program. After his involvement in anti-war protests at the Vietnamese Consulate in New York City and in Washing- 
ton, however, he was notified that his AID money had been withdrawn, and that his visa was being revoked.

An and his friends applied for permission to stay in the United States, pleading that political conditions in South Vietnam made it impossible for them to return. Their request was turned down by INS, however, upon the recommendation of the State Department.

As said that he believes States recommendation was made under pressure from the Thai government, which does not want to allow dissident Viet- 
namese to remain in the United States. He added that he believes that any of the students who returned to Vietnam would be imprisoned.

Students interested in the topics above are invited to use an experimental system developed by Polaris that offers the opportunity, through recordings, to learn directly from these people. The lectures are unique in that they permit alternating at will between the main discussion and a great many answers to interesting questions. The speaker's voice is accompanied by his own sketches which evolve on a sketchpad unit. The overall feeling is surprisingly personal and responsive.

To use the system, please call 664-6000, ext. 2800. Located at 740 Main St., Cambridge; available weekdays between 9:30 and 6.
