Course 22 may double

(Continued from page 1) admitted as full-time MIT students to a two-year Master's Degree program. At the end of the two years, what will become of the new faculty members hired especially for the additional classes? Gray said that the program has been approved on a threear-year trial basis, and may be extended at that time into an and will be evaluated by the same admissions criteria as any other applicant, according to Hansen. He emphasized that admissions standards will not be lowered. "If the Department only finds ten acceptable students, we will only take ten," he said. Hansen is leaving for Jan this week to personally interview all applicants. Those accepted would be ongoing program. The details "have been worked out with the Dean of the program," according to Gray, and the program met with no opposition from Gray or President Wiesner. Any faculty appointments made specifically for this program will be for just three years, he added. The original plans for the program were developed through the Center for Advanced Engineering Studies (CAES), according to Hansen. CAES is also sponsoring a summer course in English for the participants to begin in June, the cost of which is included in the $10,000 tuition. Hansen elaborated on MIT's conditions for participation in the program. Basically, MIT demands:

- Same admissions criteria.
- Increased tuition: approximately $10,000 per year per student.
- Funds to create office space for the students.
- Funds for use of the reactor for training purposes.
- There is also the possibility of increased research support from Israel as a future effect of the program, Hansen mentioned.

In many ways, this program will be unique at MIT. Keil explained that, "This is the first time someone was willing to look at a special program at this special price."

Blood drive pledges off

(Continued from page 1) largest percentage of their members donating. Dorm Con has donated $800.00 for these prizes, and "we're still working on other sources," she said. The drive will be held in the Sala de Puerto Rico of the Student Center Wednesday, March 5 to Friday, March 7, and Monday, March 10 to Friday, March 14. The hours will be 2:30pm to 8:15pm on March 6 and March 10, and 9:45am to 3:30pm on all other days. Appointments, which are recommended, and further information may be obtained by calling the Blood Drive Office at x3-9741 or the Technology Community Association (TCA) at x3-4831. Registration forms are available in the lobby of Building 10 and the TCA office, W2-410.
