Moynihan sees India as new nuclear power

(Continued from page 1)

pons indefinitely.

Moynihan claimed that India's nuclear energy program is not a "diversion of resources" that should be applied to India's pressing food and population problems. The money spent on the program could be used to feed 50,000 people, he said, but it is not nearly enough to accommodate "the one million people who are born in India each month."

Moynihan also commented on the recent lifting of the United States arms embargo to India and Pakistan. He said that "it was not a decision I would have made," since "it makes it difficult to enter into constructive discussions with the Indians on nuclear matters."

The arms embargo was imposed during the 1971 war between India and Pakistan which resulted in independence for Bangladesh (formerly East Pakistan).

Before the US embargo was lifted, India had been producing its own arms and receiving some from the Soviet Union. Pakistan's chief source of arms, however, has always been the United States.

Therefore, Moynihan said, in imposing the embargo, "we were helping one country and hurting the other. Pakistan complained, but India never showed any thanks." He asserted that the embargo was a lesson to other countries that "we should never be taken for granted."

Now, full scholarship assistance for your junior and senior years, plus chance to become a leader in the nuclear energy field.

Tuition, books and educational fees are all included in this new NROTC Nuclear Propulsion Candidate program, along with $100 a month to help you with your living expenses. If you qualify for the demanding yet rewarding field you can anticipate five years of employment as a regular Navy officer, using your Navy-provided education. To qualify, you must have completed one semester each of calculus and physics, or two semesters of calculus and have a B average or better. Depending upon your performance, you will be interviewed during your senior year for the Navy's Nuclear Program and for training as a Navy Nuclear Officer.

For details contact:
LT Bruce Freeman at 617-223-6216 or
LT Bob Leonard at MIT NROTC Unit, Ext. 32991

spring vacation
