**Announcing the opening of the quietest place on campus to study.**

It's your brain. But listening to yourself think with all the noise around you can sometimes be a real hassle. You've got to keep out the bad vibes, heavy music, whatever.

Here's how. Ear plugs. But not the ordinary ones you're thinking of. These plugs are beautiful. They're designed to custom-fit any size ear canal. And they're so incredibly comfortable that you can sleep with them on.

They block out all the heavy noises, but let you tune into a conversation if you want to. And they meet the standards of the Acoustical Society of America (ASA STD 1-1975). Best of all, they let you hear your brain.

So next time you're looking for a quiet place to study or meditate or do a little yoga, use your head. It was there all the time.
