Lobby 7 exhibits like this balloon carpet may become less common, as the Lobby 7 committee's budget has been cut and the position of Lobby 7 Coordinator — currently held by Suzanne Weinberg — has been eliminated.

Lobby 7 Coordinator emeritated

Laundry Note: Cut along dotted line.

implying it isn’t. Producing a single letter is easy; producing line after line of letters, all perfectly spaced and set, gets a little complicated. One type of letter isn’t enough, since printers want a variety of typefaces and sizes. The Tech’s Dymo Parameter makes eight typefaces available in 12 sizes — and the flexibility to change lines, make type run in crazy shapes, and hyphenate and justify copy. The typewriter ends up being a lot more than a collection of mirrors, lenses, and lights — it’s also a minicomputer.

What does the Loch Ness Monster look like? Probably not like this, but there is considerable evidence to believe it exists, according to Professor Emeritus of Electrical Engineering Harold Edgerton ’37 and three other scientists writing in the March/April issue of Scientific American. The article contains a history of the search for the Loch Ness Monster look like? Probably not like this, but there is considerable evidence to believe it exists, according to Professor Emeritus of Electrical Engineering Harold Edgerton ’37 and three other scientists writing in the March/April issue of Scientific American.
