Our $199 Concord, Studio Design, BSR System.

It's a common misconception that you need big, expensive components to get true high fidelity sound reproduction in your home. But the truth of the matter is, even compact-size, reasonably-priced components can deliver great sound - just as long as they've been expertly matched to get the maximum performance that each component has to offer. And that's exactly what we've done with the $199 system presented here.

This system features the Studio Design Model 26 loudspeakers. They're a true two-way design with 5½" rolled-edge woofer and 2½" cone tweeter in a properly engineered acoustic suspension enclosure. The smooth, wide-range response of Model 26 is ample evidence of the expertise of Studio Design's engineers. You'll like what you hear.

The control center of this system is the Concord CR50 which provides ample power to drive the Studio Design 26's to room-filling levels in the typical dorm room, living room or den. The use of a Field Effect Transistor (FET) and a ceramic filter in the Concord's FM section results in very respectable FM performance. And the versatile CR50 allows you to add such accessories as a tape deck and headphones.

For a number of years, the BSR 2260 has been the performance and reliability standard for budget turntables. The latest version, the 2260B, has been upgraded with the inclusion of a full-sized platter (for extra record support) and a hinged dust cover (for extra convenience). The 2260B comes fully equipped with an ADC induced magnet cartridge for minimum record wear.

You may want to substitute the new KLH 100's for the Studio Design 26's in this system for just $30 more. The slightly higher efficiency of the KLH system allows even greater volume capability.
