**DO YOU SUFFER FROM 8-DIGIT MANTISSA?**

If you suffer from the limited accuracy of eight digits in your calculator readout and yearn for more, here's fast relief.

The 4660 from National Semiconductor.
It has a 10-digit mantissa plus 2-digit exponent. Not to mention other dynamite stuff like three separate addressable accumulating memories, algebraic logic and scientific or engineering notation.
And our cure is very reasonable. Suggested retail price at the Harvard Coop is under $85.
Suffer no more.
