**How to Decide Which to Buy for a Stereo System.**

**What you can expect about $400.**

If you want good sound, you should plan to spend at least $400 for a complete component system consisting of a stereo receiver, two loudspeakers, a turntable, and a magnetic cartridge. Below $400, complete systems (and especially all-in-one compacts and consoles) often present many compromises, and you may well end up with a system that will not be up to the standard of the manufacturer's expectations, as well as our own.

**What you can expect about $200 and $400.**

Between $400 and $600 you can really begin to custom design your own system, with modular loudspeakers, a turntable, and a magnetic cartridge. Below $500, complete systems (and especially all-in-one compacts and consoles) often present many compromises, and you may well end up with a system that will not be up to the standard of the manufacturer's expectations, as well as our own.

**What you can expect above $600.**

Above $600, you can expect an improvement in sound quality equal to the increase in price.

**Bosworth and $600.**

Above $600, you can expect an improvement in sound quality equal to the increase in price.
