The programs at Honeywell's Process Control Division Phoenix challenge the integration of their potential. Therefore we require of our Software Engineers and Programmers both technical expertise and creative thinking. If you have the ability and imagination we're looking for, then you must consider Honeywell. We have openings in our Research and Engineering Departments for the above positions. They involve software design, engineering implementation and documentation and guard a real-time multi-programming environment, applied to online process control and program development. BS, MS, or DS, and experience or interest in real-time oriented operating systems, compilers, assemblers, translators, or data base technology is required.

Whether you are a summer or summer graduate, contact your placement office, Room 10 - 440, M.I.T Ext 3 - 4733 for an interview appointment or mail resume to: P. E. Lenz, Human Resources Dept, Honeywell, Inc, Process Control Division/Phoenix 2222 W. Pivot, Phoenix, Arizona 85025

“the ‘Leonardo of our age’,...” - Newsweek

“The Planet’s friendly genius” gives his social and political philosophy in this elegant autobiographical statement, and it came to pass — NOT TO STAY. Fuller writes with clarity, wit and charm as he discusses what he has learned about Truth, the Universe, and the Destiny of Man; he analyzes and responds to the current world crisis and our present economic and political system. He completes his analysis with his personal credo for living in a new age. A book not to be taken lightly, or missed. Macmillan $6.95
