**Police Blotter**

The Police Blotter is a report written by the Campus Patrol on crimes, incidents, and actions on the MIT campus each week.

**Equipment Stolen**

An office telephone and hand drill set were reported stolen from a Main Complex area on the first of the month by a faculty member who had been away for five days. Investigators found no signs of forced entry into the area, which is always kept locked.

**Stolen Intercom Recovered**

In an incident possibly related to the one outlined above, an intercom unit was reported stolen from a wall mounting bracket outside a Main Complex office on Monday. Investigators recovered the unit a short time later far from the site of the incident.

**IBM Selectric Vanishes**

An unsecured, unlocked IBM Selectric typewriter was reported stolen from an East Side building yesterday early this week. The machine, valued at over $500, disappeared from an area that although kept locked, bore no signs of forced entry.

**SUSPICIOUS PERSON**

Workers and residents of the East Campus area are advised of the recent presence in their area of the following described suspect, who is believed to have no connection with MIT yet poses from time to time as a student, a staff member, and most recently as a "janitor's assistant." Spotted by a faculty member in the area last Thursday, he was described as follows. Male, 27-29 years, 6' tall, slender build, short hair, wearing brown pants and a blue jacket with a "U-Haul" emblem on the front. Anyone spotting this subject is requested to contact Headquarters (43-1212). Officers will promptly respond.

**REM'T S Sought**

Campus Police would like to learn whether any students have undergone National Registered Emergency Technician training. If so, a call to Headquarters would be appreciated on the business line 43-2971.

---

**ENGINEERING POSITIONS**

Pegasus Division is seeking a degree Mechanical and Electronic Engineer to complement its engineering staff. Mechanical candidates should have three to five years of machine design experience in the following: Stress and Failure Analysis, Machine Concepts, Dynamic and Operational amplifiers. Knowledge of digital electronics is a plus.

Electronic candidates should have two years experience in electronic design and manufacture of electronic circuits and related products. Forward resumes to:

James R. Humphrey, Personnel Director
2890 John R. Road, Troy, MI 48084
An Equal Opportunity Employer

Koehring
Pegasus Division
