**Piet to be IFC head**

*By Richard Renner*

Steve Piet '78 of Theta Chi was elected Interfraternity Conference (IFC) chairman at the annual election last Tuesday evening.

In his speech to delegates from 24 of the 32 fraternities, Piet said, "The chairman has to learn to listen. Too often someone thinks of something and nothing happens."

Piet added "I hope everyone running for an IFC office is put to use. When you get more people involved, you get more things done." As his single campaign promise, he stated, "If I am elected, I will not have any outstanding commitments. My sole commitment will be to you, the IFC."

Jim Bigdike '78, Piet's opponent, who was later elected community relations chairman, said, "We should establish ourselves as fraternities, not as MIT students. People have poor attitudes toward fraternities. I'd like to see more service projects."

Dave Seoul '79 of Phi Kappa Theta was elected vice chairman after sending a letter from his reference, Feleforie. Seul said, "As vice-chairman I intend to aid the president in any and all tasks the chairman desires and the traditional role of chairing the executive committee." (IFC).

**GA meeting gets quorum; members lower it to 25**

*By Mark James*

The Undergraduate Association General Assembly (GA) amended its quorum of 30 Tuesday night for the first time in four months, and voted to reduce the quorum to 25.

The GA approved the report of the Committee on the Institute Budget, voted to loan $200 to the non-licensing MIT food co-op, and passed new rules for the conduct of the Nomination Committee (Nomcom). No vote was taken on lowering the quorum because 30 was previously enacted.

In action at the meeting, the GA amended its quorum rule to require that the students nominated for the Nomcom be submitted for GA approval.

**Xerox Campus Interviews**

**March 16**

*By Richard Renner*

Xerox is a multi-national corporation recognized throughout the world as a leader in the development of advanced systems for the electronics, transmission, and dissemination of information.

Xerox System Development and Electronics Technology group is located in Sunnyvale, California. These facilities are responsible for the development of electronics systems, modules, and components for future Xerox products.

Please contact your Student Placement Office for specific information.

**The Metropolitan District Commission (MDC) plans to install five air diffusers in the Charles River basin in order to mix the water and prevent the formation of a layer of oxygen-lacking water at the bottom. The mixers should reduce in the concentration of hydrogen sulfide (HSiO3), enhancement of algae quality, and an increase in the fish population.**
