TV right for classes?

By Kent Pitman
Editor's note: This is the third installment in a series examining the MIT cable system.

Video taping of lectures for presentation on the MIT cable is a frequently mentioned alternative to the overcrowding of lecture halls. How feasible is such a suggestion?

Professor of Materials Science Roy Kaplow, chairman of the Video Management Group, explained that before this could be considered, provisions would have to be made so that all students would have accessibility to cable monitors, and the costs would have to be justified by the educational benefits expected.

One of the classes specifically mentioned in the early reports to the Alfred P. Sloan Foundation, the organization which funded the installation of the cable, was 3.991, Introduction to Solid State Chemistry. The plan was to use this class as a proving ground for the cable system.

"It was a custom in the past, and maybe in the future, to run review sessions over the cable on Fridays," Professor of Materials Science Robert Rose explained. Because of the low second-semester enrollment common to that class and other factors, however, the results were not as good as they could have been.

The students seemed to like the "talk-master" style of reviews, Rose noted.

Professor of Materials Science August Witt, who taught the first class being taped, said that before this could be considered for the fall enrollment, "the instructor must be able to recognize this and compensate by adjusting to the group's needs. "

He indicated his concern that students would no longer feel a need to attend lectures, noting that he prefers to lecture to a live audience.

Professor Rose voiced similar objections to taped lectures. "That's for the birds. I don't believe in that because there's a 'human electricity' that you generate."

Rose emphasized the need of an instructor to be able to measure the response of his students. If some are not catching on as fast as of the weather or because it's the Monday after Thanksgiving, the instructor must be able to recognize this and compensate by adjusting to the group's needs.

"Al MIT has been teaching for 16 years," said Rose. "I know what I'm talking about."

Witt, on the other hand, argues that although different problems are involved in teaching via the cable, it could still be done. "If the student wants to learn the subject matter, he will -- on line or on the screen." In some cases the student would come out ahead. Witt added, because "you force the faculty to do more work."

The purpose of the whole thing is to improve the interaction between student and teacher, Rose emphasized. If part of the teaching can be accomplished by machinized techniques, said Kaplow, it would allow time for a more personalized teacher-student relationship.

Next year you could be on a scholarship.

An Air Force ROTC two-year scholarship pays your tuition and gives you $100 a month allowance. And it picks up the tab for books and lab fees, as well.

After college, you'll receive a commission in the Air Force. You go on to additional, specialized training -- as you get your start as an Air Force officer. There'll be good pay and responsibility, and some other benefits -- and a great opportunity to serve your country.

It all starts right here -- in college -- in the Air Force ROTC. Look us up -- see what we have to offer, and show us what you can offer in return.

Police Blotter

East Garage Holdup

A woman was robbed early last Friday evening on the first level of the East Garage by a man who approached her and said her "this is a robbery." The victim handed over her charge purse containing around $3 to the suspect, who then fled the area. The suspect is described as follows: Black Male, 18-20 years old, 5'5" cloudy face, wearing a beige cap and a grey or black turtleneck. Column stolen.

Chevrolet Stolen

A 1970 Chevrolet Impala was reported stolen from its parking place on AudreN Street sometime between 7pm Friday and 1am Saturday.

Olids Stolen

A 1970 Oldsmobile was reported stolen from the Tang Hall parking lot sometime between Monday and Tuesday evening.

Larceny at DuPont

A yellow and purple athletic jacket valued at around $50 was reported stolen from an unsecured place at the DuPont athletic complex last Thursday afternoon. A book of Common Meal Coupons was in one pocket. The coupons were later recovered outside, but the jacket has disappeared.
