MIT first, girls second...

Editor’s note: perhaps this is what UAP Peter Berke means when he says MIT students don’t get out enough. (Reprinted from February, 1910.)

An article in last night’s paper tells of a Tech senior who was so engrossed in his thesis work that he forgot to go to a dance to which he had invited a young lady.

The story was told that he had been working all afternoon on his thesis and in the evening he had thought of it since he got into the bath-tub, but his only comment was, “I wonder how long she waited for me to call for her.”

One has to work his imagination overtime to believe this story literally.

Graffiti artists have been reporting the Institute lately — literally! (Reprinted from December, 1909)

It seems almost beyond belief that there should be men so ignorant, so devoid of the elements of common decency as to waste their literary talents in scribbling comments, opinions and squibs on the walls and furniture around these buildings and on the notices and posters on the bulletin boards. The defacement of a certain poster placed in the corridor and posters on the bulletin boards. The defacement of a certain poster placed in the corridor of the Union to advertise The Tech is a typical example. This poster was made up at the expense of considerable time and expense of considerable time and

ENGINEERING GRADUATES,
WORK IN A PLACE WORTH WRITING HOME ABOUT.

In Saudi Arabia you’ll be near the cradle of civilization. You’ll see awe-inspiring sights such as the carved cliff tombs of Madain Saleh, created over 2,000 years ago some 600 kilometers north of Jiddah. You’ll have plenty of time to explore, too, because you’ll have a 40-day paid vacation and 12 paid holidays each year. You’ll have money enough to travel in style. Your base salary will be competitive with what you can earn in the States. Plus, you’ll receive a generous tax-protected expatriate premium.

That means your Saudi Arabian take-home pay will be approximately equal to your gross pay in the States.

In addition, you’ll be close to the world’s top vacation spots: travel throughout the Middle East. Co. fly to Rome, Paris and London. Or visit India to the east, Africa to the west.

We’ll even fly you back to the States, free, while you’re vacationing.

You’ll be working for the world’s largest oil producing company and one of the fastest growing. Currently, we have over $20 billion worth of projects under way in Saudi Arabia, and advancement opportunities are exceptional.

We’re looking for Mechanical, Geological, Chemical, Electrical, and Petroleum Engineers with bachelor’s, master’s, or Ph. D. degrees. If you’re graduating this fall, spring, or summer, we’d like to talk to you.

Additional information is available now in your career planning office.
