The average cost of installing a full sprinkler system as a fire protection system was estimated at $40,000. As a result of recent changes in the Massachusetts Building Code, it is likely that the MIT board of directors will be faced with the decision of whether or not to proceed with the installation.

The MIT cable television system appears to be the first system ever installed in the nation specifically for college students rather than for the general public. A survey conducted by MITV last year revealed that a large proportion of viewers would be interested in the cable during special broadcasts of certain programs.

Despite the fact that the system would be available only in the dorms, many students have already signed up. The system is expected to be operational by the end of the year.
