Yet more snow

(Continued from page 2)

Plant employees and close to twenty college students have been working almost constantly since Monday, clearing the areas completely blocked all paths through the campus.

With the snow over, "all parts of the campus" and "all buildings" are now accessible, but safe travel is a problem, according to infirmary workmen. The chairman of the school, "I haven't been able to get any cars, cars," said while still on the campus, which is still completely blocked all paths through the campus.

The dining problem was taken care of by students working overtime in the dining hall in Walker Memorial. The chairman of the campus, "I haven't been able to get any cars, cars," said while still on the campus, which is still completely blocked all paths through the campus.

The infirmary was one service which was able to keep running very smoothly during the storm. Three nurses, Monte Carin, Joyce Bishop, and Janet Byers worked through the storm and were "kind of drugged out" according to infirmary spokesman James A. W. Smith. The infirmary was one service which was able to keep running very smoothly during the storm. Three nurses, Monte Carin, Joyce Bishop, and Janet Byers worked through the storm and were "kind of drugged out" according to infirmary spokesman James A. W. Smith.

"There has been a lot of out-of-people coming to the infirmary and they were coming in with "things we normally would see" like the flu and similar maladies. Although there was no case of the flu, people were admitted for treatment of injuries caused by falls from buildings.

"I don't want to say that all the people were coming in for advice because they could not come in. I want to say that there was no problem with finding beds for patients. I added that the Campus Police had been very helpful in bringing people into the infirmary or..."

...to Mass. General when necessary.

---

EARN OVER $650 A MONTH RIGHT THROUGH YOUR SENIOR YEAR.

If you're a junior or a senior majoring in math, physics or engineering, the Navy has a program you should know about. It's called the Nuclear Propulsion Officer Candidate-Collegiate Program (NUPOC-C for short) and if you qualify, you can earn as much as $650 a month right through your senior year. Then after 16 weeks of Officer Candidate School, you'll receive an additional year of advanced technical education. This would cost you thousands in a civilian school, but in the Navy, we pay you. And at the end of the year of training, you'll receive a $3,000 cash bonus.

It isn't easy. There are fewer than 400 openings and only one of every six applicants will be selected. But if you make it, you'll have qualified for an elite engineering training program. With unequaled hands-on responsibility, a $24,000 salary in four years, and gilt-edged qualifications for jobs in private industry should you decide to leave the Navy later. (But we don't think you'll want to.)

Ask your placement officer to set up an interview with a Navy representative when he visits the campus on February 27, or contact your Navy representative at 617-223-6216 (collect). If you prefer, send your resume to the Navy Nuclear Officer Program, Code 312-B468, 4015 Wilson Blvd., Arlington, Va. 22203, and a Navy representative will contact you directly. The NUPOC-Collegiate Program. It can do more than help you finish college: it can lead to an exciting career opportunity.

NAVY OFFICER.
IT'S NOT JUST A JOB, IT'S AN ADVENTURE.
