Student government elections will be held on April 12, 1978

Candidates interested in running for class office or UAP/UAVP should drop by the U.A. Office Room W20-481 after Friday, March 10 for petitions and procedures.

Nominating petitions are due in the U.A. Office by Thursday, March 23 no later than 5:00 pm.

Non-candidates interested in serving on the elections committee should contact David Soule (661-0668) or leave their name with Lee Fleming (3-2696) at the U.A. office.

Questions about what responsibilities an office entails should be directed to the current officers. Questions about elections procedures may be addressed to Peter Berke or David Soule.

Kick Off Your Career With Courier

Courier Terminal Systems, a newly risen star in the computer peripheral industry spectrum, is a major supplier of general purpose teleprocessing terminals and Point-Of-Service systems.

Courier is a leader in utilization of MOS and bipolar microprocessors in applications traditionally assigned to larger scale machines. Our terminal controllers (actually computer systems) utilize a true multiprocessor architecture to obtain a large system throughput. All our products are microprocessor based.

Courier is located in Phoenix, Arizona (within a 5 minute drive of the Arizona State University campus). The Phoenix area is noted for its "SUNBELT" climate and wide range of recreational opportunities. It is the location of the Stanford University Engineering (Digital Systems) majors who are ready to assume major design responsibilities. Areas of interest should include: compilers, operating systems, distributed processing, intelligent terminals, language processors and microprogrammable logic.

Positions are available at the BS, MS and PhD levels. We will be on campus for interviews on March 27 and 28. Please see the MIT Placement Office (Rm. 13-170 x2-4732) to get on our schedule and learn more about what could be the most challenging opportunity in the computer industry today.

We are an equal opportunity employer in practice as well as principle.

A summer of intellectual stimulation in a Mediterranean climate.

This June, you can go to one of the world's top universities and take courses in such fields as history, literature, languages, sciences, mathematics, technology, the social sciences, and education.

Between classes you'll find yourself in one of the world's top recreation areas - near hills for hiking, ocean beaches, San Francisco Bay, and San Francisco itself - in some of the world's top weather.

Send for your copy of our 1978 Summer Session Bulletin and an application for admission by mailing the coupon below.

Notes
* Notes are not guaranteed to appear. Where space is available, official institute notices have higher priority. Final exams and other Departmental events have the lowest priority. Anyone with an event to pass, five events will be listed before others. Importance and timeliness are also considered.

- March 17 is the last day to add subjects to registration. It is also the last day for juniors and seniors to change an elective from or to pass/fail.
- Dog Found - A male Bassett Hound with a clipped right ear was found at MIT Wednesday afternoon. March 8. I have been taking care of him, but would like to return him to his original owner. If you know anything about this dog, please call 494-8148.
- Freshman Evaluation forms are now available from freshman advisors. An evaluation form should be filled out for each subject for which a freshman is registered and turned in to his or her instructors by Friday, March 24. Extra copies will be available in the FAC, Room 7-103.
- The Institute Committee on Computational Needs and Plans invites everyone to attend a regular committee meeting on Thursday, March 16, 1972 from 12:30 until 1pm in the Marlin Lounge, Room 37-252. Any topics related to computers, information processing and text handling may be raised at that time.
- A student-faculty lecture by Digital Equipment Corp. will be held 1pm in the Bush Room, 10-00. Topics to be discussed include the formation of computer families at D.E.C., and several LSI design techniques. Questions and answers session to follow.
- Transportation in the Year 2000 is the Cambridge Forum topic on Wednesday, March 15, at 6pm at 2 Church Street in Harvard Square. Professor Alan Altshuler, chairman of MIT's Department of Political Science, will be the featured speaker. Admission is free.
- Joseph V. Charyk, president of the Communications Satellite Corp., will be the second speaker in the seminar series on Engineers in Society sponsored by the MIT Department of Aeronautics and Astronautics. He will be introduced by Dr. Joseph B. Allam at 6pm on March 14 in Room 37-212.
- A small food sale, sponsored by the MIT Black Students' Union, will be held in Lobby One March 16 and 17 from 1 to 2pm. Complete lunches will be served.
- For information about a unique "Sea-Hoteling" way to spend the upcoming spring vacation swimming and snorkeling in Florida, write Jerry Barron, c/o the American Youth Hostels (AYH) Metropolitan Detroit Council, 3024 Coolidge, Berkley, MI 48012. For information about 2 week summer sailing trips to the Bahama (departing from Miami) write to Jess Russell, Travel Department, AYH Headquarters, Delaplane, VA 22025.
