**Cross Country sixth**

By Bob Host
Senior Barry Bayus finished fifteenth in the NCAA District I Cross Country Championships last Saturday in Franklin Park, thus qualifying for the Division I championships later this week in Rock Island, Ill.

The MIT team barely missed qualifying for the team championships with a sixth place finish Saturday. However, only the top five teams qualify and Saturday's competition marked the end of the Beaver's season. Behind Bayus for MIT were Colin Kerwin '82, Pat Hamilton '81, Walter Sargent '80, and Jeff Lukas '82.

Bayus ran the 8,000 meter course in 24:51 in weather officially described as cloudy and cool, although with the temperature hovering around 90 degrees. Bayus did not have an opportunity to run under ideal conditions, which for him are 15 to 20 degrees cooler.

The outlook for the next season appears promising as Bayus is the only graduating senior. With the presence of two freshmen on the varsity squad, the team should be strong for a few years to come.

**Sports cont. Water polo finishes**

By Gordon R. Haff
Despite their third place finish in the New England, the MIT Water Polo Team ended up going to the Eastern last weekend when a team was unable to show. Normally, the top two teams in each of the East Coast's four divisions are entered in that tournament.

MIT started off the weekend with a defeat at the hands of Bucknell 11-2. Bucknell later went on to the finals after defeating Yale in the semi-finals 19-3.

In the second game of the tournament, MIT lost to Richmond 6-4. Coach John Benedick said "We should've have lost that game. We just let them in.

"In their final game, the Beavers lost Washington and Lee 10-5. With the exception of the Richmond game, Benedick was pleased with the performance of the team.

These games were the last ones for many members of the MIT water polo squad. Preston Vorlicek, Ken Calvert, Bob Dobbin, Eric Byler, and notably Pete Griffith, All New Englanders last year are all being lost to graduation. There are a number of new players, including a goalie, but it remains to be seen whether they can fill in for the departing seniors.

"OK I admit, JEEPS. See the aneide the ref is going. Why you should give up your job together and fill the leftover spaces. The production staff who have to put it all together and fill the leftover spaces. The business department who drum up the ads, and of course the production staff who have to put it all together and fill the leftover spaces.

If you are interested in any of this, or even have an idea for something else that might go into this paper, stop by any Sunday or Wednesday evening to talk. There's Always room for more.

---

**Sixteen Pages aren't Easy!**

Sixteen pages cover 1,280 square inches of paper with 18 stories, 6 pictures, 2 graphs... for a lot more ads than any of us want to think about. Needless to say, this keeps all of us busy: the writers and photographers who provide the news, the editors and salespeople in the business department who drum up the ads, and of course the production staff who have to put it all together and fill the leftover spaces.

**How Government's spending can price you out of work**

Inflation's danger is very real to you because it threatens your chances of landing a job. We say our government, by trying to give us everything we want right now, actually causes inflation. Why?

If government collects enough taxes to pay its extra bills as goes, there's no use everybody's money. You pay taxes and revenue in taxes on your income. And companies pay more income and tax on the materials and services they have to buy. So everybody's tax bill goes up.

But we think government is spending money even faster than it can collect taxes. Everybody still has to buy. So everybody's tax bill goes up. Inflation is the result and making it the cause. The more government spends, the more government spends, the higher your tax bill goes up.

But as we all know, government is spending money even faster than it can collect taxes. Everyone still has to buy. So everybody's tax bill goes up. Inflation is the result and making it the cause. The more government spends, the higher your tax bill goes up. Inflation is the result and making it the cause. The more government spends, the higher your tax bill goes up.
