Danger Money: great "new" progressive rock

The contributions of the rest of the band are not to be ignored. John Wetton’s vocals are sharp and clear, and he has improved his singing by extending his range and adding harmonies. He does his slip in “Caesar’s Palace Blues,” where he seems to be straining to reach the notes. Drummer Terry Bozzio does an admirable job of filling the slot left open by Bruford. While not nearly the drummer his predecessor was, Bozzio manages to let his own fluid style carry the group.

* Does not include Professional Services or Eye Examination

MANY PEOPLE
THINK VERY HIGHLY
OF US.

FOR A LOT OF
WRONG REASONS.

It might surprise you, but Hughes doesn’t make aircraft. What we do has been expressed nicely by our Chairman of the Board, Dr. Allen E. Puckett: “We’re involved in a wide range of communications technologies, making sensors that operate on all parts of the electronic spectrum, and computers and signal processors that issue commands or store and present data. In the midst of the dramatic electronic information explosion, Hughes is putting data sensing, communications and data processing advances to work for people like you and me.”

If you’re an EE, ME, AE, IE, Physics, Material Science or Computer Science major, you could become part of this exciting and challenging commitment. You could become involved in aerospace, ground systems, industrial electronics, space and communications research. And don’t worry about getting lost - at Hughes, we work in small groups where individual initiative is valued highly.

Hughes - for all the right reasons. For details on our opportunities, contact your placement office, or write: Manager, College Relations, Hughes Aircraft Company, P.O. Box 90515, Bldg. 100/445, Los Angeles, CA 90009.
