Swimming eighth in NE's

Greg Stave

The MIT Men's Swim Team posted their best finish in over a decade with an eighth place finish in the sixty-six annual New England Championships held at Springfield College on March 1-3. As a result of their performances during the dual meet season and at the championships six swimmers and one relay team will represent MIT at the Division II National Meet.

The Beavers began the meet last Thursday by placing fourth in the 800-yard freestyle relay, an event swum only in championship competition. The relay team of John Dickson '80, Mark Hanzinger '81, Bill Dawson '82, and Dave Erickson '81 clocked in with a spectacular 7:13.3 smashing the old MIT record by nine seconds and earning a trip to the Nationals in Geneva, New York. This same relay team also qualified for the Nationals in the 400-yard freestyle relay. That same evening, Captain Preston Vorlick '79 placed sixteenth in the 1650-yard freestyle event. On Friday Preston Vorlick, a two time All-American, earned the right to try for a third title. Vorlick had the sixth fastest time in the qualifying heats for the 200-yard breaststroke and earned a spot in the finals. For the first hundred and fifty yards of the final he was in sixth place, but, just as he had done in previous New England's, improved his position during the last two laps and finished in third. His time was 2:14.9. That same day Dave Erickson finished sixth in the 200-yard freestyle after qualifying in 1:46.7. John Dickson picked up valuable points by finishing thirteenth. Other high finishers included Mark Hanzinger, twelfth in the 200-yard backstroke (2:05.9). George Dowd '81, eleventh in the 200-yard butterfly (2:03.9) and Mark Larson '82 fourteenth in the 50-yard freestyle sprint (23.86).

In the springboard events Josh Lindsay '80 placed thirteenth on the one meter board. He scored 260.35 points for nine dives. Ken Brady '79 finished a strong fifth in the three meter competition on Saturday and Sunday March 17 and 18 MIT's eighth place finish in the twenty five school field this year put them ahead of Amherst, Tufts and the Coast Guard Academy. In the contest won by Williams College, Tufts, one of only two teams to beat the Beavers this season, placed sec-

SCIENTISTS AND ENGINEERS

DON'T LET YOUR TALENT GO UNAPPRECIATED

Science Applications, Inc. is looking for BS, MS and PhD candidates in Physics, Mathematics, Electrical Engineering, Astronomy, and Computer Sciences. Work areas include high technology analysis and evaluation; computer simulations and modeling, program planning, and management support primarily related to national defense and energy resource development. Salaries and individual incentive are discussed. Analysts, scientists, and engineers will find many opportunities to pursue work in a wide variety of technical and functional areas, as well as assume increasing responsibilities in technical, project, and line management.

The SKI interview will be the one of the 60 interviews to be on campus to most interested students Wednesday, March 16th. Contact the placement office for an appointment.
