Vietnam-China peace talks hostile — Both the Vietnamese and Chinese delegations lashed out at each other at the first session of peace talks Wednesday. The Vietnamese accused the Chinese army of massacring civilians in a manner "more savage than the US imperialists' My Lai massacre" during its month long invasion. Vietnam has proposed establishing a demilitarized zone and an immediate exchange of prisoners of war.

Brezhnev re-elected — A joint meeting of the Supreme Soviet unanimously re-elected Leonid Brezhnev as its chairman. Brezhnev, of prisoners of war.

Supreme Court rules in libel case — In a recent decision, the Supreme Court has opened the newsgroup indexing process to inquiry in libel cases. News officials said they feared the press' First Amendment rights were eroded, and that the public would suffer the greatest losses. On the other hand some journalists like William F. Buckley said that they welcomed the ruling.

Proxmire awards Golden Fleece — Senator William Proxmire (D-Wis.) awarded his monthly Golden Fleece Award to the Department of Housing and Urban Development for spending $100,000 for a rural housing project.

Atomic tests doubled leukemia cases — Recent studies have shown that children who grew up in the St. George, Utah area between 1950 and 1960, during the atomic testing period, developed twice as many cases of leukemia as those born before or after the tests. A 1953 test shot, Atomic Energy Commission documents show, dumped 6,000 million of radiation on St. George residents in one morning. The generally accepted annual dose to the general population is 50 millirems.

Like most families, is worked hard, played when it could, and had its share of growing pains. And from 1934 to 1940, Lewis Hine captured it all with his camera. Now you can see 120 of these remarkable photographs at the Museum of Fine Arts' new exhibition, "Lewis Hine: Photographer of the Human Condition."

See America through the lens of Lewis Hine. Museum of Fine Arts, Boston
