Tech men preferred small wives

(Continued from page 12) of medium height, about 4'11" inches shorter than the man. Too, nature, and not art, must provide them with the light complexion which the voters yesterday desired.

Although the girl he takes to a fraternity dance may dress daintily, her husband must conceal her charms under sensible, less expensive clothing. In her case, his belief in the expression "clothes make the woman" vanished upon application of the wedding vows.

The average salary which voters yesterday thought necessary for venture into matrimony is $2500 (middle-salar + accuracy). The taking of the final plunge occurs when he is 25.6 years old and his fiancée, after 12.52 months of engagement, is 22.0 years of age. All this time, she will be wearing a diamond token of his affection.

Before he marries, they will both have a thorough physical examination, and after about 1.86 years, they will receive their first of 2.96 bills from heaven. If he and his wife are of different religious persuasion, these bills may be either raised in his religion, hers, oragnostically, which does not leave much room for imagination.

If male, they will probably go to Tech. 1.06 servants will take care of their charming cottage.

Technology odds did not fare so well in the voting, which for the most part cast aspirations on the lot of engineers as dimes and as matrimonial prospects. However five or ten stalwart individuals, bucking the general ridicule, resolution, declared the odds fitting prospects for dates and marriages, naming several girls as especially desirable. In addition, three voters designated the Institute as their favorite girls' "beau" and, climbing on the wrong side of the bandwagon which choose Wellesley's favorite and Radcliffe its next best women's college.

Local interviews for software professionals

The purpose of every Wang product is the same: to enhance productivity

At Wang Laboratories, we make computer and word processing systems. But we're really not in the computer or word processing business.

Our business is productivity. And that's a people business.

Because it's people who produce. Machines just make it easier.

Maybe all this sounds obvious. But you'd be surprised how many computer and word processing manufacturers forget that the end users of their products are people.

At Wang, we never forget.

That's why our products are simpler to use than theirs. And more efficient.

And that's why we're growing faster than anybody else in the business.

And that's why we're interested in Bachelor's, Master's or PhD candidates.

Productivity²

Located in Lowell, Massachusetts, we offer excellent salaries and benefits including full relocation, profit sharing, stock purchase plan, medical and dental insurance, and full tuition reimbursement.

In addition, we offer all the assets of New England — beautiful beaches, mountains, and forests; the historic, cultural, and educational richness of the Greater Boston area; and perhaps most important, an enviable standard of living within the reach of the software professional.

Wang's representatives will be on campus on October 18th. To arrange for an interview, register at the placement office or if unable to meet with them on that day, call Sue Morse, Professional Recruiter, collect at 1-(617) 851-4111, ext. 3344. Or send her your resume as soon as possible at:

Wang Laboratories, Inc.
One Industrial Avenue
Lowell, MA 01851

We are an affirmative action employer.

WANG

Making the world more productive.
