World
Those feet were made for walking — Anthropologist Anna K. Beaulieu's new book, showing the feet of apes and hominids high to belong to hominoids that lived nearly 1.5 million years ago.

NATION
Carter beats Kennedy in Florida straw poll — President Carter received the overwhelming support of the Florida State Democratic Convention yesterday, in a straw vote that was completed early in October. Mr. Carter's victory had been long anticipated, as his candidacy is supported by many influential state politicians, including the present governor and many legislated leaders.

At the same time, the results of several public opinion polls released yesterday indicated a slight decline in Senator Kennedy's popularity among Democrats.

CAMPUS
McCormick against forced conscription — An overwhelming 84 percent of McCormick residents recently signed a petition opposing the conscription, indicating that last week in The Tech, House President Annita Bliss spoke for herself and not the dorm in supporting the plan. Of those not signing the petition, 27 percent belong to the ad hoc McCormick Dining Committee. "We have alternative groups open to students who wish to continue with graduate studies, as well as to undergraduates students receiving bachelor's degrees by the date of hire. Those interested in summer employment under the program should apply by Nov. 30, allowing for time processing security clearances.

The fellowship program provides full tuition and fees plus a stipend of $525 per month for the academic year for those meeting certain requirements, including an allowance for books and local expenses.

The grant program provides an annual award of $1000 which the recipient may use in any way that benefits her professional development.

Announcements
Campus:

All students should obtain final examination schedule at the Information Center, 1-21. Examinations not listed or a conflict in examination times as two examinations in the same period, must be reported to the Schedule office by Wednesday, November 21, 1979.

Bell Laboratories Graduate Research Assistant Program: Bell Laboratories offers full financial support for women with established performance in the following fields: chemistry, mathematics, engineering, electrical engineering, experimental human psychology, materials science, mathematics, operations research, physics and statistics. The fellowship program provides full tuition and fees plus a stipend of $525 per month for the academic year for those meeting certain requirements, including an allowance for books and local expenses.

The grant program provides an annual award of $1000 which the recipient may use in any way that benefits her professional development.

Fellowships and grants will be released to interested women for the duration of the graduate program provided the student maintains satisfactory progress towards the doctoral degree.

Applications must be received by November 15 and all supporting material by January 31, 1980. Two fellowships and four grants are awarded annually for graduate study beginning in September. Applications are usually submitted during the candidature period.

For further information, please contact Dean Jeanne Richard, Graduate School Office, room 3-136.

Notes

Special Collections Laboratory (LSLC) is accepting applications for its Graduate Research Assistant Program. Among the new positions open are graduate student work who have not yet completed academic or professional training. While the program cannot provide scholarship support or financial for thesis work, undegradaute work which seems assured of public dissemination can be supported. The humanists include such subject areas as history, politics, anthropology, linguistics, and the history of art.

Young scholars have been used by young people to carry out a wide variety of research projects, including the exhibits of documentary photographs, printed or audiovisual, the history of local culture, and films on anthropological subjects.
