World

Iran — The United Nations secretary general, Kofi Annan, has called for a review meeting of the UN Security Council to deal with the US-Iranian issue. Annan described the "acute situation" as being the most serious threat to world peace since the 1962 Cuban missile crisis. The Carter Administration now approves the UN initiative, but Carter himself doesn't think that the UN appeal will be very effective.

Israel surrenders land — Israel is continuing to give up the occupied land gained during the 1967 and Yom Kippur wars. Most recently, Israel returned to Egypt the Alum oil field in the Gulf of Suez, its most serious sacrifice of the peace treaty so far.

Local

Couple gains fame — From anonymity to fame, that is the story of Gerry and Diane Green, who were victims of the controversial abortion issue. Since the death of their son Chad from leukemia, they have become national figures. Gerry Green is now the national chairman of the American League of Human effort, which is trying to separate individual medical decisions from the medical establishment.

Weather

Most of the rain should be ending by this morning. With partly cloudy skies back most of this week, and a few lingering showers, highs should reach 60. Clouds tonight, but still well above the normal with a low near 44. Variable clouds Wednesday, with highs near 61, lows near 43. Chance of some more, but much lighter rain Wednesday or Thursday. Look for above normal temperatures through the week. Chance of rain 40 percent this morning, 20 percent this afternoon, 30 percent Wednesday night and Thursday.

IAP's 10th

(Continued from page 1)

severely limiting the availability of tools. Another year, "The World's Largest Yo-Yo" was constructed by students working with Prof. Jim Williams. It dropped off the Green Building. Over a thousand disappointed people, including the national press, ground as the yo-yo failed to climb back up its 265 feet of cable.

Many favorite events of the past are back once again this year. The yo-yo and the College Bowl have always been popular as well as certain courses that have been offered during each year of IAP, such as an "Introduction to Law" by Prof. Jeffrey Melnick.

The second IAP Guide, including a complete listing of 1980 IAP activities, will be distributed by early December. The IAP office will also be posting calendars in Lobby 7 and in Tech Talk in order to aid students in finding activities that interest them. Pre-registration is not required for participation unless specified in the course description.

TYPISTS
HOLIDAY SPECIALS
Increase your buying power around the holidays. For the holiday season...work a couple days, weeks or months,...on TIME FORINARY assignments! You'll earn top dollar...in nice companies...easy to reach on the 7! Enjoy the holidays, work around them! Call or come in.
