Fencers' goal: top three

(Continued from page 14)

...sense of spatial perception, rhythm, quickness, confidence, and a great desire to win. Captain George Gonzalez-Rivas agreed: "When a tournament has been narrowed down to the four best fencers, it's usually the person who wants it the most who will take home the trophy," he said. Sollee added, "We are definitely in the top 10 right now, and we are aiming to become one of the top three fencing schools in the nation." The team will get the chance to reach this goal, due in part to the help of MIT Athletic Director Ross Smith, who was responsible for getting MIT back into the IFA. Now, the engineers will be able to compete in the post-season IFA tournament, which decides who will go to the NCAA national tournament.

If you can't beat the system, you can at least have a part in creating it...

LOGICON offers the opportunity. The kind you've spent all those years in college to prepare yourself for. The kind a lot of companies promise but don't deliver. The kind that will challenge your utmost capabilities and imagination.

The opportunity is created by the exciting state-of-the-art nature of our wide-ranging computer oriented services, coupled with our personal, people oriented environment. This ideal complement of high technology and individual recognition breaks old limits, and gives the aggressive graduate the chance to really take part in the future of the world of systems and software.

With a continuing need for ENGINEERS, PROGRAMMERS, TECHNICIANS and many more disciplines in even more specialties, Logicon has an eye for progress. Help us make it happen... now!

A representative from Logicon will be on campus February 7.
