**MIT soccer starts off with a loss**

By Eric R. Fleming

The MIT soccer team opened one of its toughest campaigns ever Wednesday, and suffered a 4-1 defeat at the hands of a vastly improved team at Harvard.

The Crimson, ranked ninth among Division I New England teams earlier this week, showed why it deserved that slot as it controlled the game from start to finish. MIT could not get untracked during the match because of the constant pressure applied all over the field of play by Harvard, often double and triple teaming the ball.

Mike Smith opened the scoring for Harvard on a penalty kick at 19:43 of the first half, following a steal from MIT fallback Malcolm Duke '81 deep in Tech territory. A superb individual effort by Maurice Kelleher-Summinietto built Harvard's lead to 2:0 at 41:02. Summinietto broke past four MIT defenders and drilled a shot into the lower right corner past goalie George Kraynak '81. The Engineers struck back quickly, thanks to freshman midfielder Mihalu Mainoliu's goal with just two minutes remaining in the half.

MIT's hope to use the late tally as momentum was quickly dashed in the second half. The home squad took total command of the game, nearly letting the Engineers out of their own end. Smith scored his second goal of the game on a centering pass from 1:43 of the half to put the Crimson up by two once again, and junior Ayruah closed the scoring at 45:40 on a centering pass from John Duggins. MIT had only one more good scoring chance, again by Mainoliu, but a good now by the Harvard goalie kept the door closed.

In addition to the fine performance of Mainoliu, Duke and Grover, Boston Conference all-star John Buss '83 played well, while keeping good balance late in the game. Coach Walt Alesci was pleased by his team's determination, but not of the Harvard squad, "They had the better team."

Saturday morning at 11am, MIT hosts Babson, last year's Division III national champions. Also on the schedule this year are Brandeis and WPI, also ranked in New England, and Division I squads Boston University and Boston College. MIT finished 2-0-1 with five unposted setbacks) in 1979, but should do better this fall. If they do improve, no one can say they did not earn it.

**“I can’t think of another company that offers greater opportunity for technical achievement.”**

John A. Bullwinkle

President and Chief Operating Officer

Cray Research, Inc.

Graduate of Rose Polytechnic Institute

---

“Cray Research is a young, viable company whose efforts have a real impact on the immediate and long-term future of scientific computing. Our major industry contributions, the super-scale C90/1 computer, now stands in a class by itself as the technical standard of excellence by which all other scientific computers are measured.

We're proud of our professional team's achievements and, also, anticipating continued accomplishments in the future as we staff and equip our facilities. To help speed these successes, we are looking to you—the ambitious college graduate—as a key source of potential and promise. The careers we offer stand second to none for level of technical challenge, intrigue, and opportunities for making immediate contributions.

As a small organization committed to programs, we actively promote on-going personal advancement. We foster a spirit of teamwork and professionalism in both our technical research and our management and support staff. And, we consequently invite applications from individuals seeking the chance to pursue and achieve their very best. If your background and goals match our profile, we're sure you'll consider a career future with Cray Research.

Our technical recruiter will be at the Massachusetts Institute of Technology campus on October 4.

Check with your placement office to verify dates and sign on our schedule. If unable to attend an appointment, you may request your resume for immediate attention at:

Don Byas, Cray Research Inc., 1440 Northland Drive, Mendon, MA 01756.
