Fairfield Falls
Engineers beat top-rate team

(Continued from page 11) by turning back Fairfield rallies. The offense suffered some bad news, however, when halfback Mike Burnett '81 had to leave the game with a torn ligament. The extent of his injury is not known at this time, although it is doubtful that he will return for the Engineers' next game this Saturday at New York Maritime.

Women's volleyball

The women's volleyball team rebounded from a couple of defeats early last week to defeat Eastern Nazarene, a top Division II school, 2-1, Saturday afternoon at Eastern Nazarene.

Field hockey

Julia Neuringer '81 scored the only goal of the game as the Engineers defeated Clark on Saturday. The victory was the team's second in a row, following a 3-2 victory over Endicott Wednesday.

Water Polo

MIT did well in its own tournament Friday and Saturday, winning over Hamilton 14-4, and Army, 14-10. In the contest against the Cadets, Dave Erickson '83 scored seven goals, while John Friedman '83 had five tallies.

Cross country

Lowell, a Division II School, fell to the Engineers, 23-32, at a meet Friday at Franklin Park. Tech's record is now 3-1.

We'll be interviewing on campus Monday, November 3.

The only limitations are the ones you bring with you.

An Equal Opportunity Employer M/F/H

Room at the bottom has never looked so good.

because it's been created by more room at the top.

Go ahead and be cynical. But listen.

The facts are not just that we have more bonde ide opportunities for new graduates than ever. The clincher is that all of these entry level openings are enthusiastically endorsed by our technical managers and operations directors.

That's right, you shouldn't take that for granted, at any company. But what this positive attitude at CSC means is that it's not likely you'll come on board only to find yourself on the wrong side of a professional "generation gap." The chances are outstanding that you'll quickly find yourself working with (as well as for) nationally preeminent individuals in their fields who are eager to help you make the right decisions, without being oppressive about it.

The motivation behind this attitude is worth knowing.

Because the expansion curve here has been so steep, more top posts have been created. Now most of these have been filled by the mid-level staffers already on board who demonstrated their upward mobility. This in turn created a whole new array of mid-level openings, most of which are being filled by our junior people on the rise.

All of which creates a pretty vigorous "career vacuum" at the entry level.

And although you may already know that CSC corporate-wide is one of the largest information sciences companies in the world, you'll want to learn more about the Systems Division's role creating some of the world's largest computer-based communication systems, command/control/communication systems, satellite information systems, advanced energy management and control systems, and turnkey computer-based systems of high sophistication that will help people and governments worldwide.

If your degree is in EE, Computer Science, or their equivalent, we'd like to introduce you to people very much like yourself who have helped make CSC the industry leader in software and computer-based systems.

We couldn't have gotten there without them... and we can't expect to stay there without you!

See your Placement Office for details, or write to The Director of Professional Staffing, MC218.

Raychem
A multinational corporation operating in the technological needs of the telecommunication, process energy and electronics industries.

We're the Company where you can exercise your creativity and education in the design and development of sophisticated products, systems and sub-systems.
