Clark comments on his opposition

(Continued from page 1) shows the massive desire of the American people for an alternative," he said. Although Clark called Anderson a "more articulate and sincere" candidate than either of the others, he said that a vote for Anderson would be "a vote of endorsement for the establishment." Those who are dissatisfied with the establishment, he said, should vote for the Libertarians. Clark advocates the repeal of all victimless crime laws. He is in favor of legalized abortion, saying, "You should not make anything criminal unless it is clearly and irrevocably wrong." He supports the Equal Rights Amendment. He is emphatically against the draft, which he called "against American tradition and against the rights of individuals."

Registration for Physical Education classes for the second quarter will be held Tuesday, October 28 at 8-10 in the dome of the MIT Gymnasium. Seniors—please be sure of your status!

MIT Amnesty International Human Rights Group is sponsoring a vigil on Sunday Oct. 19, Mother's Day in Argentina, 2-4 pm Holyoke Center, Harvard Square. The vigil is to show solidarity with the mothers of Plaza de Mayo in their demand from the Argentine government for information about their disappeared loved ones. We will have booties, general information and petitions. Come by, support human rights, and help these courageous women.

We're The Energy Systems Company. Helping to develop the world's energy resources. Extracting them, purifying them, conserving them, and cleaning up after them.

At C-E, we're always looking for new sources of energy. Your energy can help.

We're The Energy Systems Company. Helping to develop the world's energy resources. Extracting them, purifying them, conserving them, and cleaning up after them.

At C-E, you could become involved with some of the most exciting and most advanced energy engineering programs underway today:

The leading standardized nuclear steam supply system. Efficient utility scrubbers that remove SO₂ from stack gases. C-E's large diameter drilling systems that operate at depths of up to 6,000 feet. Wellheads that control working gas pressures up to 15,000 psi. And other products too numerous to mention here.

You'll have the opportunity of putting your engineering schooling and experience to work, utilizing and sharpening the other skills you already have, and branching into new areas.

We're a $2.33 billion company equipped this gas production platform in the Gulf of Mexico with production processing equipment (center); C-E Lummus supplied the proprietary technology for Brazil's largest petrochemical complex (right). If you'd like to know more about the numerous career opportunities available with The Energy Systems Company, write: Corporate College Relations, Combustion Engineering, Inc., 300 Long Ridge Road, Stamford, Connecticut, USA 06902.

Graduate Students!

Nominations Hearings for all INSTITUTE, FACULTY, & CORPORATE Committees.

to be held OCTOBER 21, 22, and 28.

Seats open include the following: (for a complete listing, drop by Room 50-222)

Faculty Committees
Committee on Academic Performance
Committee on Graduate School Policy
Committee on Student Affairs

Presidential Committees
Commencement Committee
Advisory Committee on Women Student Interests
Equal Opportunity Committee

For more INFORMATION call MIT x2195, or stop by Walker Memorial Room 50-222.
