FEAR AND LOATHING IN ELECTRONICS

So, you want to follow your academic career with challenging real-world problems but you are wary of Big Company Politics—and you’ve developed a healthy loathing of neckties and regiments. Is that what is bugging you, Busby? Well, cheer up and consider Megatest. In just four years Megatest has become a major innovator in LSI Test Equipment. Our machines test more microprocessors and EPROMS than anybody else’s. We introduced the world’s first commercially available Magnetic Bubble Memory Test System. That’s not all—we’ve attained this standing in the industry while remaining a small, friendly, employee-owned company. We’re young and we work like maniacs but we also devote a lot of time to having fun.
