Pilates, which appears on the EP.

****

The EP, a 12" 45 rpm record with 5 songs on it, is a whole lot of fun. It's not punk rock, you see. The record is a collection of early performances by the bands and is the only one in the world. The songs by the bands were recorded on the same day, with the bands rehearsing the songs the night before. The songs are not overplayed.

T: Do you think you made new fans tonight just the same?
B: I hope so.

CENTRAL WAR SURPLUS

**********

The Great Message they transmitted to us was the power of the human spirit. And that's what I hope they'll bring to the world. The world needs it. They need it. We need it. We need to remember that we are capable of great things.

Overall, the Tech was pleased with the performance of the bands on the EP. It was a great night for music and a great night for the Tech.
