FRESHMEN:

the Experimental Study Group still has a few openings this term. If you are interested in an alternative to regular curriculum lectures, consider joining ESG. We offer a flexible, self-paced study program in math, physics, chemistry, and humanities subjects with plenty of tutoring support available. For more information call Holly Sweet at ext. 7786 or drop by 24-612 before February 13.

EXCITING CAREER OPPORTUNITIES

Yes, if you had joined Dranetz — with your Bachelor’s or Master’s degree in EE or Computer Science — when the Model 3100 project team was being formed, you would have worked on every phase of its design! And gained the invaluable experience and perspectives developed only by completely immersing yourself in a challenging, multifaceted, original design.

The young engineer who did just that is now working on even more advanced problems, with greater independence. From the beginning, however, the senior members of the team provided not only theoretical support and practical hand-waving guidance, but also opportunities to create, invent, investigate, and develop parts of the complex new instrument.

That’s the thing about Dranetz. We’re not too large to involve every new engineer in responsible, meaningful assignments, under careful, expert guidance. On the other hand, we’re large enough to have a wide variety of challenging projects in progress at all times.

Will you be part of the next Dranetz team to achieve an important breakthrough in the art and science of electronic measurement? Would that be a challenge. That’s the thing about Dranetz. We’re not too large to involve every new engineer in responsible, meaningful assignments, under careful, expert guidance. On the other hand, we’re large enough to have a wide variety of challenging projects in progress at all times.

FIELD SERVICE ENGINEERS

Explore the earth in the crucial search for oil and gas reserves as a manager of a field service laboratory. Apply your degree to the fullest and learn more than you ever imagined. Earn an outstanding salary and drive your personal company car.

Birdwell is expanding. And we need field service engineers who want more from a job than sitting 8 to 5 behind a desk. Position features excellent advancement opportunities. Requirements are a degree in the physical sciences — E.E., M.E., E.E.T., engineering science, physics, geophysical engineering — and an indomitable spirit that welcomes challenge.

Birdwell, a division of Seismograph Service Corporation, is an international geophysical exploration company involved in wireline services for oil and gas wells and the collection and formulation of raw seismic data.
