So Okay, Heather signs a Mickey in Sarah's evening soda pop and cuts out of the sanitarium to blow off Diana, who, dressed for action, confesses to Jeff the real identity of PI, causing Jeff to freak out in a big way while Anne listens at the door and loses it behind a plastic palm. Jeff bolts to the General Hospital, flattens out a couple of ugly nurses, rips off some baby footprints, and peels out to the sanitarium with Dr. Rick Weber, who is mega-interested please contact:

You are eligible for food reimbursement funds up to $500-$1,200 per child, per day. If not interested please contact: Haigh, Box 52-MA5: Corona del Mar, CA 92625.

**E-Systems continues the tradition of the world's great problem solvers.**

Steinmetz was one of the few geniuses concerned with the practical aspects of electrical engineering. His pragmatic analytical approach led to the development of efficient electrical power grids as we know them today. Scientists and engineers at E-Systems are carrying on in his tradition. Through the combination of sophisticated analytical and simulation techniques, they are evolving optimal system solutions to some of the world's toughest problems in electronics. E-Systems is recognized as one of the world's leading problem-solving companies in the design and production of communications, data, antenna, intelligence and reconnaissance systems that are often the first-of-a-kind in the world.

For a reprint of the Steinmetz illustration and information on career opportunities with E-Systems in Texas, Florida, Indiana, Utah or Virginia, write: Lloyd K. Lauderdale, V.P., Research and Engineering, E-Systems, Corporate Headquarters, P.O. Box 226030, Dallas, Texas 75226.
