Another probation for Pi Lam

By Stephanie Pollack

Pi Lambda Phi has been placed on probation until April 1, 1982, by the Interfraternity Conference Judicial Committee (IFC). The penalty was imposed after several incidents that occurred during initiation in February. An open letter from JudComm to the chapter's community (see next page) called the probation a "corrective," rather than a "punitive," measure. During the period of probation, JudComm Chairman will review the "rush program, educate education

Housing tight until 1985

By Barry S. Suman

In his recent address to the faculty, President Paul E. Gray '54 affirmed that MIT housing committee would be unable to get into the dormitory until the same basis as for all other students. In addition to the new dormitory, MIT will provide sufficient housing for the increasing numbers of women students. According to Sherwood, the new dormitory at 500 Memorial Drive will be composed of at least one section of single-sex living for women and as much coeducational space as demand may dictate.

The response of upperclassmen wishing to move to 500 Memorial Drive has pleased Sherwood. "Ninety-one students have signed up to move in," he said. "22 in groups and 29 individuals. We're trying to work out an equitable room assignment policy for groups and individuals." He noted that Dormitory Council officers and other interested upperclassmen are establishing that policy and writing a house constitution.

The MIT Musical Theatre Guild proudly presents
